

## **Monett Veterinary Hospital Expands Animal Care and Pet Healthcare Wellness Services**

*October 13, 2026*

MONETT, MO - October 13, 2026 -

Monett Veterinary Hospital, an AAHA-accredited, full-service small animal hospital serving southwestern Missouri since 1953, has announced an expanded focus on its animal care and pet healthcare services, centered on proactive, preventative wellness for pets throughout every stage of life. The expanded emphasis highlights comprehensive wellness programs designed to detect and address health concerns before they become serious.

The practice has provided care for dogs and cats for more than seven decades and has held AAHA accreditation since 1983, a distinction held by fewer than 15 percent of pet hospitals in North America. The renewed attention on Monett Vet Hospital Animal Care and Pet Healthcare reflects the hospital's commitment to preventative medicine as a foundation of long-term pet health.

The wellness services include comprehensive nose-to-tail examinations that monitor weight, dental health, heart function, joints, and overall condition. The hospital also provides tailored vaccination plans based on

each pet's lifestyle, age, and individual risk factors, along with year-round prevention for fleas, ticks, heartworms, and intestinal parasites. Routine diagnostics such as bloodwork and health screenings support the early detection of potential issues.

The hospital customizes its wellness approach for every life stage, from puppies and kittens through senior pets. Pet owners receive guidance on nutrition, behavior, and long-term health, supported by the hospital's broader range of services that include surgery, boarding, and daycare. The practice places particular emphasis on building lasting relationships with pets and their families through education, ongoing support, and compassionate care.

"Preventative care gives pets the best opportunity for a long and healthy life, and it allows families to understand what their animals need at each stage," said Erin Carnes, a spokesperson for Monett Veterinary Hospital. "The goal is to work alongside pet owners as partners, catching small concerns early and providing the education that helps every pet thrive."

Carnes noted that the wellness focus reflects decades of experience and the hospital's long-standing accreditation. "Accreditation requires meeting rigorous standards in diagnostics, treatment, and facility quality," she said. "That standard shapes the way care is delivered, from a puppy's first visit to the specialized attention a senior pet requires."

Monett Veterinary Hospital was established by Dr. C.J. McCormick in 1953 and has grown from a single-veterinarian practice into a comprehensive animal care facility. Over the years, the hospital has earned recognition for its standards of care, including the AAHA Commitment to Excellence Award in 2007 and a Veterinary Economics Architectural Award for Excellence.

Monett Veterinary Hospital is a full-service, AAHA-accredited small animal hospital located in Monett, Missouri. Its services include routine and major surgery, orthopedic surgery, laser surgery, radiowave surgery, radiology, internal medicine, an in-house laboratory, pharmacy, preventive care, therapeutic and science diets, grooming, boarding, doggie daycare, and the TLC Wellness Care program. The hospital serves pet owners throughout the region and remains focused on supporting a better quality of life for pets and their families through every stage of their lives.
