

J&D Tree Service Expands Stump Grinding Service for Southwest Missouri Properties

October 21, 2026

MONETT, MO - October 21, 2026 -
J&D Tree Service, a locally owned tree care company serving Southwest Missouri, has formally expanded its stump grinding service to address the stumps left behind after tree removal and from older trees across the region. The expanded offering uses specialized equipment to grind remaining stumps below ground level, eliminating tripping hazards and clearing the way for smooth, usable yards.

The service addresses a common situation for homeowners and property managers throughout Barry, Lawrence, Stone, and surrounding counties. After a tree is cut down and debris is hauled away, the underground portion of the stump often remains in place. Grinding that stump below the surface removes an obstacle that can interfere with landscaping, mowing, and general yard use. Many property owners choose to add grinding as a follow-up step once tree removal is complete.

Stump grinding is typically quoted as a separate service from tree removal. Tree removal covers cutting a tree down and clearing the resulting debris, while grinding addresses the portion that stays underground.

J&D Tree Service Stump Grinding is available as a standalone project or as an addition to a scheduled removal, with free, no-pressure estimates provided before work begins.

John Marmon, owner of J&D Tree Service, said the expansion reflects demand from property owners who want their yards fully usable after a tree comes down. "A stump left in the ground is more than an eyesore. It can be a genuine tripping hazard and it limits what a homeowner can do with that section of their yard," Marmon said. "Grinding the stump below ground level gives people a clean slate for new landscaping, a garden bed, or simply an open lawn."

The company operates specialized grinding equipment designed to handle stumps of varying sizes and locations. Each job is carried out with full liability insurance in place, offering property protection throughout the process. The company has completed more than 500 projects since it was founded in 2005 while maintaining a claims-free safety record.

Marmon noted that the expanded service fits within the broader range of tree care the company already provides. "Homeowners often tell us they did not realize stump removal was a separate step," he said. "Making the service clear and easy to add means fewer surprises and a finished result people can actually use."

In addition to stump grinding, J&D Tree Service offers tree removal of hazardous, dead, or unwanted trees, along with professional pruning and trimming to improve tree structure and longevity. The company also maintains emergency response availability for downed trees and storm-related hazards across its service area, which includes Monett, Cassville, Aurora, and Mount Vernon.

J&D Tree Service is a locally owned and operated tree care company based in Monett, Missouri. Founded by John Marmon in 2005, the company brings more than 20 years of industry experience and has completed over 500 jobs for homeowners and property managers across Barry, Lawrence, Stone, and surrounding counties in Southwest Missouri. The company is licensed and insured and provides free estimates for its services.
