

Anytime Plumbing, Inc. Earns 4.8-Star Rating After More Than a Decade Serving as Santa Cruz Plumbers

September 03, 2026

SANTA CRUZ, CA - September 03, 2026 -

Anytime Plumbing, Inc., a fully licensed plumbing company serving Santa Cruz County, has reached a customer service milestone after more than ten years on the review platform Yelp. The company now holds a 4.8 customer rating on Yelp based on 143 independent reviews, reflecting a sustained record of residential and commercial service across the region.

The rating covers a wide span of completed work, including emergency repairs, drain and faucet service, water heater installation, leak detection, and commercial plumbing projects. The company provides same-day service and maintains emergency availability 24 hours a day, seven days a week, throughout the year.

The milestone arrives as demand for licensed plumbing work continues across Santa Cruz County, where aging infrastructure and seasonal weather can contribute to burst pipes, sewer line failures, and water heater malfunctions. The company reports that its long-standing presence on the platform reflects consistent handling of both routine maintenance and urgent repairs.

Amer Zaghlouleh of Anytime Plumbing Inc said the rating reflects the daily focus of the company's field

technicians. "A rating built over more than ten years tells a different story than a short burst of feedback," Zaghlouleh said. "It reflects thousands of service calls handled across changing conditions, and it shows that customers have returned and recommended the work over a long period of time."

The company's services extend well beyond emergency response. Anytime Plumbing, Inc. offers drain cleaning, hydro jetting, roter service, garbage disposal repair, and sump pump work. Its water heating division handles repair and replacement and provides guidance for property owners weighing new units. Additional offerings include leak detection, sewer line repair, backflow testing, slab repair, and main water line service.

The company also provides heating and boiler services, radiant heating, water softening, and water filtration. Camera inspection services allow technicians to identify hidden issues within pipes and lines, and specialized work is available for bathrooms, kitchens, and restaurant facilities. The company additionally shares information on water heater maintenance and regional water restrictions.

Zaghlouleh noted that transparency in pricing has factored into the company's reviews. "Property owners want a clear estimate before work begins, whether the job is a dripping faucet or a full sewer line replacement," he said. "That approach has shaped how the company operates and how customers describe their experience."

Community members can follow updates, service tips, and seasonal reminders by visiting Anytime Plumbing on Facebook, where the company posts information for residents and businesses throughout Santa Cruz County.
