

## **Zahnarzt Basel Highlights Year-Round Emergency Dentist Availability Near Basel SBB**

*October 08, 2026*

Basel, Basel-City - October 08, 2026 -

Zahnarzt Basel, an emergency dental practice operating in Basel, Switzerland, has outlined the scope of its emergency dental care, which remains available 365 days a year to address urgent dental needs across the city.

The practice, located in Basel City near the Basel SBB railway station, provides treatment for a range of dental emergencies, including severe toothaches, broken or chipped teeth, loose crowns, and dental accidents. The proximity to Basel SBB places the clinic within reach of patients traveling from throughout the region when urgent care is required.

Emergency dental situations often occur outside standard business hours, and the clinic maintains availability every day of the year, including weekends and holidays. The practice operates an on-site dental laboratory, which supports turnaround for certain treatments and allows the dental team to address complex cases without referral delays. Information about the practice and its location can be found at [g.co/kgs/UqxLEY6](https://g.co/kgs/UqxLEY6).

In addition to emergency care, Zahnarzt Basel offers services that address ongoing oral health needs. These include dentistry for children, dental implants, and preventive prophylaxis treatments such as professional cleanings. The practice also provides diagnosis and treatment for craniomandibular dysfunction (CMD), a condition affecting the muscles and joints connecting the jaw to the skull.

The clinic structures its care to accommodate families, children, and patients who experience anxiety about dental visits. Staff members provide information about emergency treatment costs in advance, allowing patients to understand expected expenses before care begins.

A dentist at the practice noted the role of accessibility during dental emergencies, saying that dental emergencies rarely arrive at a convenient time, which is why availability every day of the year matters so much. The dentist adds that when a patient arrives with a severe toothache or a broken tooth, the priority is to provide prompt, professional attention and a clear understanding of the treatment required.

The practice employs a team working in general dentistry, implantology, oral surgery, and CMD treatment, using current dental technology and methods. The combination of a central Basel location, extended availability, and a range of services is structured to reduce the time patients wait for treatment during urgent situations. A map showing the practice location and surrounding area is available at [batchgeo.com/map/7b1b0dc11022f90f2f033d88806ff313](https://batchgeo.com/map/7b1b0dc11022f90f2f033d88806ff313).

The dentist also added that preventive care operates alongside emergency treatment, saying that managing small problems early through regular prophylaxis and checkups can prevent many emergencies from developing in the first place. The goal at the practice is to support long-term oral health for every patient who visits.

Zahnarzt Basel is a dental practice based in Basel, Switzerland, specializing in emergency dental care and assistance for urgent dental issues. The practice operates 365 days a year and offers services including emergency treatment, children's dentistry, dental implants, preventive prophylaxis, and care for craniomandibular dysfunction. Supported by an in-house dental laboratory and located near the Basel SBB railway station, the clinic serves patients throughout the Basel area.
