

125 Nights Sleep Test Offered To Those Who Buy Mattress Online

June 06, 2016

June 06, 2016 - PRESSADVANTAGE -

One Bed, a business in Hawthorne, Queensland, Australia, has announced that those who buy mattress online would be able to sleep test on it for 125 nights. The company is known for its innovative 'one bed', which has a number of high tech features. By offering customers the opportunity to test it, there has been a tremendous increase in sales. Those who are not satisfied can return the bed within the first 125 nights and get a full refund.

Dylan from One Bed says: "Our One Bed is the most amazing bed you will ever come across. We are so convinced that people will love it that we not only offer a 10 year warranty on it, we give people the chance to test it for 125 nights. If, after that time, they don't like it, they can return it for a full refund, no questions asked."

The one bed, which comes as a double, queen, king, king single, and single mattress, consists of three innovative layers. These layers create a perfect balance between durability, support, and comfort. It also comes with 'zero motion transfer', which means that no one is ever bothered by the movements of his or her co-sleeper again. This is achieved through the combination of memory foam and latex, which gives the

mattress a cushioning effect, stopping the transfer of motion.

Those who have tried the mattress have been full of praise. "Finally a mattress that both my partner and I can enjoy," says Jess T. on the company's website. "I am a very light sleeper and would always wake up during the night. With my Onebed I don't feel when he tosses and turns. Love your work... I will recommend this to everyone."

One of the most unusual things about the onebed is that for those who purchase online mattress will be sent in a box. Due to the material of the mattress, it can easily be compressed without losing any integrity. It can then be fitted in a medium sized box, which also makes it very easy to carry into a room, avoiding the well-known struggle of getting mattresses up stairs and through doorways. Instead, a good night sleep is available almost instantly.
