

Beary Landscaping Acquires MJS Landscaping and Seasonal Solutions KC

September 11, 2026

LOCKPORT, IL - September 11, 2026 -

Beary Landscaping, a commercial landscaping and snow management company headquartered in Lockport, Illinois, has announced the 2025 completion of two strategic acquisitions, adding MJS Landscaping and Seasonal Solutions KC to its organization. The acquisitions expand Beary Landscaping's operational capacity, geographic coverage, and service capabilities across the Midwest.

Through the acquisition of MJS Landscaping, a Waukesha, Wisconsin-based firm that has served residential and commercial clients since 1997, Beary Landscaping gains expanded landscape maintenance capabilities and a deeper presence in suburban and urban markets within the Wisconsin region. MJS Landscaping has built its business around residential landscape design and construction, commercial maintenance, seasonal color enhancements, tree and arbor care, snow and ice removal, and stormwater management, adding complementary service capabilities to the Beary Landscaping portfolio.

The acquisition of Seasonal Solutions KC, an Overland Park, Kansas-based commercial landcare and landscape enhancement firm serving the Kansas City metropolitan area, adds seasonal service capacity and snow and ice management resources that bolster Beary Landscaping's readiness for year-round service

delivery across an expanded geographic area. Seasonal Solutions KC has served a client base that includes commercial buildings, residential developments, retail centers, corporate headquarters, and parks and sports complexes, and has received regional recognition for the quality of its commercial landscape work.

"This strategic growth is part of our long-term vision to provide dependable commercial landscaping, landscape maintenance, and snow management services across the region," said Brian Beary, owner of Beary Landscaping. "By integrating MJS Landscaping and Seasonal Solutions KC into the Beary family, we are bringing additional expertise, increased fleet capacity, and enhanced responsiveness to every client property we serve."

Beary Landscaping has operated across the Chicagoland region for more than four decades, employing a team of more than 500 trained landscape professionals and serving commercial and multi-family residential clients across Illinois, Indiana, and Wisconsin. The company provides services spanning commercial and residential landscape maintenance, seasonal color enhancements, snow and ice removal, landscape construction, tree and arbor care, landscape design, and landscape lighting, with an operational structure built around year-round service delivery and consistent quality standards across all properties in its portfolio.

Beary Landscaping was founded in 1985 and currently holds memberships in the Illinois Landscape Contractors Association, the National Association of Landscape Professionals, and the Snow and Ice Management Association. The company has been recognized with the Better Business Bureau Sign of Excellence Award and with Unilock Awards of Excellence for hardscape installation in Illinois and Indiana.

The two acquisitions reflect Beary Landscaping's broader strategy of expanding its service footprint through the integration of regionally established firms that bring demonstrated client relationships and operational expertise to the organization. Both MJS Landscaping and Seasonal Solutions KC will continue serving their existing clients throughout the transition, with details regarding service integration, including service contacts and administrative processes, to be communicated to clients as the process moves forward. The combined organization extends Beary Landscaping's operating range from the Chicagoland region into southeastern Wisconsin and the Kansas City metropolitan area.

"As demand continues to grow across Illinois, Indiana, and Wisconsin, these acquisitions allow us to scale without compromising the attention to detail and customer-first approach our clients expect," said Beary. "Our commitment remains the same. We protect properties, reduce risk, and deliver consistent, year-round peace of mind."
