

Ionox Cherry Pitter Now Available with Gift-Wrapping

June 03, 2016

June 03, 2016 -

Ionox has announced that customers can now choose to have their Ionox pitting cherries products gift-wrapped upon purchase. The company hopes that this option will help make their cherry pitter an even more ideal gift for chefs and amateur cooks. The company strives to make the check-out and customer service process as smooth as possible, and feels offering gift-wrapping is just one more way to help their clients get exactly what they want.

The pitter has been recommended as a gift by one reviewer on Amazon, who wrote, "Perfect cherry and olive pitter. I gave as a gift to a cooking friend of mine. Necessary kitchen tool."

"I received one of these as a gift and it intrigued the whole family who took turns easily removing pits from cherries. The only problem is that now people are asking me for cherry pies, jams, etc..." said a customer who had received the pitter as a gift.

The products description reads: "The Ionox Cherry Pitter has a nice smooth feel to it, and fits in large and small hands with comfort. The pitter has an internal spring, which opens the jaws every time so it is always ready for the next cherry. Easy to use with one hand feeding cherries and the other hand squeezing the pitter."

The cherry pitter is made from a high-quality zinc alloy material, which means it won't be stained by cherry juice, or transfer a metallic flavor to the fruit. It's currently available in black, but the company is coming up with designs for two new vibrant colors to be added to the line.

The spring action mechanism of the pitter is protected by the casing, meaning it won't become lodged with fruit pieces. This feature also makes cleaning the product much simpler, as it can be placed in the dishwasher or washed with a mild soap and water.

The cherry stoner can be purchased on Amazon for \$9.95. Visit <http://www.amazon.com/pitting-cherries/dp/b00vca77oo/> for more information.
