

Keathley Landscaping Expands Yard Drainage Services as Certified Contractors Across North Texas

September 18, 2026

GARLAND, TX - September 18, 2026 -

Keathley Landscaping, a NDS Certified Drainage Contractor serving the greater Dallas region, has expanded its yard drainage and grading services to address a rising number of complex water management problems reported by homeowners throughout North Texas communities. The company, led by owner Logan Keathley, focuses on resolving drainage and flooding issues that often result in costly home damage not covered by standard homeowners insurance.

Seasonal heavy rainfall continues to create challenges for property owners, where standing water, soil erosion, and foundation concerns frequently follow major storms. Keathley Landscaping reports that many affected homeowners are unaware that flooding damage tied to poor yard drainage is typically excluded from insurance policies, leaving repair costs as an out-of-pocket expense. In response, the company has emphasized solutions ranging from French drains and property grading to large custom-designed, buried drainage pipelines built to handle even the most difficult site conditions.

The firm holds certification through NDS, a distinction that reflects specialized training in modern water management methods. This credential supports the company's work as one of the drainage contractors Garland residents and neighboring communities turn to for grading, drain installation, and long-term water control.

"Drainage problems rarely look the same from one property to the next, and that is why a careful evaluation matters before any work begins," said Logan Keathley, owner of Keathley Landscaping. "The goal is to identify the root cause of the water issue and design a system that manages it permanently, rather than applying a temporary fix that fails during the next major storm."

Keathley Landscaping provides drainage Sachse homeowners rely on for both residential and larger-scale projects, along with expanded coverage for lavon drainage concerns in surrounding areas. The company's service range reflects growing demand across multiple communities where clay soils and flat lots contribute to persistent water accumulation.

"Homeowners often feel a sense of dread when heavy rain is in the forecast, and that stress is understandable," Keathley added. "A properly engineered drainage system removes that uncertainty and protects one of the largest investments a family will ever make."

Beyond lavon drainage work, Keathley Landscaping offers a full range of related services, including sod installation, landscape lighting, stonework and retaining walls, flowerbeds and hardscapes, landscape design and installation, fence repair and installation, patio covers, outdoor kitchens, firepits, and tree trimming and large tree removal. This combination allows the company to address both functional water management and broader outdoor improvement needs within a single project.

Founded in 2002, Keathley Landscaping is a full-service landscaping and drainage company based in the Dallas, Texas area. The company serves Dallas, Garland, Wylie, Plano, Sachse, Lavon, and surrounding communities, offering landscape design and construction alongside specialized drainage solutions. As a NDS Certified Drainage Contractor, Keathley Landscaping continues to focus on practical, durable results for property owners facing water management challenges throughout North Texas.
