

Ionox Pencil Grips Are The Number Six Special Education School Supply Product on Amazon

June 07, 2016

June 07, 2016 -

Ionox has recently been recognized by customers for their use as special education tools, and is now considered the number six product on Amazon for special education school supplies. Ionox pencil grips have received many reviews from customers who have reported that the grips were improving their writing or their child's writing by making writing implements easier to hold.

Pencil grips can help children and adults alike improve their fine motor control. Individuals with little fine motor control may have trouble holding a pen or pencil, making writing a difficult, and often frustrating, task. Pencil grips provide a wider, softer surface for the writer to grip.

The Ionox grips are ergonomically designed for maximum comfort. The silicone material of the grips is sturdy, yet soft, and is considered non-allergenic and FDA food-grade safe.

The grips can be used in the classroom, and are appealing to both young and advanced students, as they come in a mix of six vibrant hues: pink, blue, yellow, red, green and purple.

One customer commented on the success she has had with implementing the pencil grips with her children, one of whom is left-handed, the other right-handed. One of her children is autistic, and she reported that the grips have helped him learn proper pencil holding and writing techniques.

The silicone pencil grips are available in a six or twelve pack. Educators looking to buy the grips for the classroom can take advantage of free shipping on orders over \$49.

The product is available for \$7.95 for a 6-pack, and \$9.95 for a 12-pack.

Every product comes with a 100% guarantee. The pencil grips can be purchased on Amazon at <http://www.amazon.com/pencil-grip/dp/b01415jirk/>.
