

Fence Commandos Jupiter Opens New Location to Expand Fencing Solutions Across Northern Palm Beach and Southern Martin County

September 21, 2026

JUPITER, FL - September 21, 2026 -

Fence Commandos Jupiter has opened a new location at 675 W Indiantown Rd, Jupiter, FL 33458, establishing a local base for delivering residential, commercial, and industrial fencing solutions engineered for South Florida conditions. The new location supports the company's work serving Jupiter, northern Palm Beach County, and southern Martin County, including communities such as Palm Beach Gardens, Royal Palm Beach, Riviera Beach, and Stuart.

As a fence contractor in Jupiter, the company centers its installation approach on the demands of coastal environments and high winds. Its installations are rated for 140 to 150-plus MPH winds, reflecting the requirements of Florida's High-Velocity Hurricane Zone. To achieve that performance, the company relies on 36-inch-plus concrete ballast footings set in coastal sandy soils and marine-grade 316 stainless steel hardware selected to resist salt-spray corrosion over time.

Todd Dobson of Fence Commandos Jupiter said the new location reflects the demands property owners face in the region. "South Florida places real stress on any fence, from sustained coastal salt exposure to hurricane-force winds, and the new location allows the company to serve the surrounding communities with installations built for those conditions," Dobson said. "Details such as deeper concrete footings and marine-grade stainless hardware are chosen because of what this environment requires."

The range of fencing services in Jupiter and surrounding areas allows the company to address varied property needs. Homeowners can select vinyl privacy fencing, powder-coated aluminum fencing, or pressure-treated wood fencing, while commercial and industrial property owners can turn to commercial chain-link systems and heavy-gauge industrial perimeter fencing. Pool safety fencing is also part of the service list, addressing code considerations common to residential properties across the region.

Automatic gates and access control extend those options for properties that require controlled entry. The company installs gate operators and entry systems for residential, commercial, and industrial applications. For applicable automatic gate and access control projects, installations incorporate UL 325 gate-safety standards, which govern the safe operation of powered gate systems.

Dobson added that the breadth of services was intended to meet a wide set of property types. "A homeowner seeking privacy fencing and an industrial property manager needing a secured perimeter have different requirements, and offering everything from vinyl and aluminum to commercial chain-link and access control lets the company match the solution to the property," he said. "UL 325 standards guide the automatic gate work so that powered systems operate safely."

The company's material choices reflect its focus on Florida conditions across each service line, from powder-coated aluminum profiles suited to pool code compliance to galvanized and vinyl-coated chain-link for high-security perimeters. The Jupiter location provides a local point of presence for property owners, HOA boards, real estate professionals, and commercial managers throughout the service area.

Fence Commandos Jupiter is a fence contractor based in Palm Beach County, Florida, specializing in perimeter security, automated access control, and hurricane-engineered fencing designed for the state's coastal environment. The company serves northern Palm Beach County and southern Martin County with a full range of residential, commercial, and industrial fencing services.
