

GrassRoots Turf of Middle Georgia Marks Three Years of Lawn Care in Macon

September 25, 2026

MACON, GA - September 25, 2026 -

GrassRoots Turf of Middle Georgia is marking its third year of serving homeowners and businesses throughout the Macon region, a milestone reached under the leadership of company owner and Middle Georgia native Ray Pippin.

Since opening its doors three years ago, the company has built its reputation on turf treatments and weed control programs tailored to the soil and climate conditions of Middle Georgia. What began as a locally owned operation has grown into a recognized provider of lawn treatment programs across Macon and neighboring communities, including Perry, Warner Robins, Byron, and Forsyth.

Over the past three years, GrassRoots Turf lawn care services have expanded to address the full range of turf and landscape needs seen across the region. Current programs include weed control backed by a Weed Free Guarantee, lawn aeration, seasonal fertilization, soil health and pH balancing, mosquito control, tree and shrub care, and custom lawn disease and insect programs. Each lawn care program is designed around the

specific nutrient and condition needs of a given property.

The anniversary reflects steady growth for a company that entered a competitive field as a local, owner-operated business. Ray Pippin, who founded the company and continues to lead it, credited the milestone to a focus on consistent results and attention to individual properties.

"Reaching three years in Macon means a great deal to me as someone who grew up in Middle Georgia," said Ray Pippin owner of GrassRoots Turf of Middle Georgia. "The goal from the first day was to deliver lawn care treatments that actually work for the yards and conditions we have here. Watching that approach take root across the community has been the most rewarding part of these three years."

The company attributes much of its longevity to the way it structures each customer relationship. GrassRoots Turf assigns certified lawn care technicians to its treatment programs and provides scheduling and service notifications so property owners know when applications are planned. Plans are offered on a monthly basis with no hidden fees, and the company continues to provide a free lawn care evaluation to assess a property and recommend a treatment plan.

"The past three years have taught us that no two lawns are the same," Pippin added. "Our lawn care program is built to adapt to soil conditions, grass types, and the seasonal challenges that come with growing turf in Middle Georgia. That flexibility is what keeps a lawn healthy over the long term."

As it enters its fourth year, GrassRoots Turf plans to continue serving residential and commercial clients across the Macon area with its established range of turf, weed control, and pest management programs. The anniversary comes as demand for professional lawn treatment service continues across the region during the active growing season.

GrassRoots Turf of Middle Georgia is a professional lawn care and weed control company based in Macon, Georgia, operating under the tagline "Lawn Care Treatments That Work." Owned by Ray Pippin, the lawn care company serves both residential and commercial clients in Macon, Perry, Warner Robins, Byron, and Forsyth. Its offerings include weed control, lawn aeration, fertilization, soil health management, mosquito control, tree and shrub care, and custom lawn disease and insect programs.
