

Emergency Private Dentist Victoria Adds New Same-Day Appointment Slots for Urgent Cases at McKennell Dental Practice in London

September 17, 2026

LONDON, UK - September 17, 2026 -
McKennell Dental Practice has added new same-day appointment slots to its emergency dental diary from 15th September 2026, allowing more patients in Victoria, London, and the surrounding area, including Pimlico, to access urgent dental care without delay. The expanded availability addresses the needs of patients experiencing sudden dental pain, trauma, or acute dental problems that cannot wait for a routine appointment.

Dental emergencies cover a range of situations where immediate attention is needed. Severe toothache, a knocked-out or broken tooth, a lost filling or crown, a dental abscess, or significant swelling around the mouth and jaw are among the most common reasons patients seek same-day urgent dental care. Left unaddressed, some of these situations can worsen quickly, with infections in particular carrying the potential to spread beyond the immediate area if not treated promptly.

A study titled "Characteristics of the Emergency and Urgent Care System Important to Patients: A Qualitative Study" (DOI: 10.1258/jhsrp.2007.007097), conducted by O'Cathain A, Coleman P, and Nicholl J, and published in the Journal of Health Services Research & Policy on 1 April 2008, explored patients' experiences of emergency and urgent care in North-East England. The findings highlighted that urgent conditions can cause substantial discomfort and disrupt daily life, and that timely access to emergency care was important to patients in managing their symptoms. These findings relate to urgent care generally and should not be interpreted as evidence specific to dental emergencies or any particular practice or treatment outcome.

Same-day appointments at McKennell Dental Practice begin with an assessment of the presenting problem. The dentist examines the affected area, takes X-rays where clinically indicated, and identifies the cause of the issue before discussing the available treatment options with the patient. The aim of the emergency appointment is to relieve pain, stabilise the situation, and establish a clear pathway for any follow-up treatment that may be required.

Details regarding dental emergency appointments at McKennell Dental Practice can be viewed at: https://smile4u.co.uk/dentist-pimlico-london-victoria/general-dentistry/dental-emergencies/.

McKennell Dental Practice operates as a private dental clinic in Pimlico, close to Victoria, serving patients across Central London. Emergency appointments are available to both new and existing patients, with same-day access prioritised for those presenting with acute symptoms. The practice also provides routine dental examinations, fillings, extractions, hygiene appointments, and restorative treatments alongside its emergency provision.

The team adapts the pace of appointments for patients who experience anxiety around dental visits, giving them more time to feel informed and comfortable before any treatment begins. This is particularly relevant in emergency situations where patients may already be distressed from pain or trauma when they arrive.

Practice information and details about the team at McKennell Dental Practice is available at: https://smile4u.co.uk/dentist-pimlico-london-victoria/.

In some cases, the pain associated with a dental emergency may stem from a problem affecting the inner pulp of a tooth, where the nerve and blood supply sit. When infection or damage reaches this part of the tooth, the resulting pain can be severe and persistent. During the emergency consultation, the dentist will carry out a thorough assessment to identify whether this is the cause of the problem. Where the clinical findings indicate it, root canal treatment may be recommended as the appropriate course of action.

Root canal treatment involves removing the affected tissue from inside the tooth, cleaning and shaping the

root canals, and sealing the tooth to prevent reinfection. The procedure is carried out under local anaesthetic. Whether root canal treatment is the right option in any individual case depends entirely on the clinical assessment carried out during the appointment, and no treatment is undertaken without a clear explanation of what it involves and why it has been recommended.

Treatment insights about root canal treatment can be viewed at: https://smile4u.co.uk/dentist-pimlico-london-victoria/general-dentistry/root-canal-treatment/.

McKennell Dental Practice can be contacted directly to arrange a same-day emergency appointment or to ask questions ahead of attending. Patients experiencing acute dental pain or trauma are encouraged to contact the practice as early in the day as possible to maximise the likelihood of being seen on the same day.
