Daniel Hall Combined Enterprises has announced that a new educational podcast episode is now available entitled, 'Publishing Your First Kindle Book'. The podcast is designed to teach people the ins and outs of publishing a Kindle book. It focuses on every element, from deciding on a title to choosing the price. The podcast is already proving to be very popular. People are encouraged to listen to the Real Fast Results podcast here.

Daniel Hall himself says: "In this podcast, I'm going to actually step you through how to go about publishing your first Kindle book. We're going to focus on those things that you really need to focus on and teach you what you can outsource."

In the podcast, Daniel Hall starts by explaining why Kindle continues to be an excellent medium to sell books and how, while overall sales have tapered somewhat, they continue to be higher than those of physical books. He provides some details about what Kindle is, and how it can be used to monetize a business. He then delivers the real ins and outs of 'how to publish your first Kindle book'.

Those who have listened to the podcast, or who have read its transcript, have been very pleased with the information that has been provided. "Love the detailed notes," says Jamie W. on the Real Fast Results website. "Makes it easy to get the podcast info when it isn't convenient to listen. It is also easier to refer to notes, instead of having to re-listen, when trying to find something you mentioned,"

In the podcast, Daniel Hall starts by explaining how to choose a title and how the title has to make a promise that the book then delivers on. He then provides hints and tips on how to actually write the content of the book, suggesting that using a PowerPoint presentation can be beneficial. To become profitable Kindle authors, Daniel Hall suggests that they should also include a free offer, must copy edit their book, and focus on the cover before finally publishing it.
