

A&M Roofing Marks Two Decades of Service With Focus on Roof Repair Excellence

September 18, 2026

MCLEAN, VA - September 18, 2026 -

A&M Roofing, a McLean-based roofing company, has reached a milestone of more than twenty years serving residential and commercial property owners throughout the region. The company has built a consistent record of five-star customer reviews across its range of roofing services during that time.

As a licensed Northern Virginia roofing contractor, A&M Roofing offers new roof installation, complete roof replacement, routine maintenance, and roof repair for structures damaged by storms, fallen trees, or age. The company also provides gutter, siding, window, and door services, along with roof inspections conducted by HAAG-certified technicians.

The milestone comes as area property owners continue to seek established contractors for both residential and commercial projects. Over the past two decades, A&M Roofing has expanded its expertise to address a variety of structures, including specialized work in flat roofing for commercial buildings and modern residential designs.

"Reaching twenty years in this industry reflects the trust that property owners have placed in the work," said Mark Collins, spokesperson for A&M Roofing. "The five-star reviews the company has received come from customers who value quality materials, proper certifications, and technicians who take the time to assess each roof carefully before recommending a course of action."

A&M Roofing attributes its longevity to a combination of experienced contractors, quality materials, and industry certifications. All technicians carry proper certifications and insurance to perform their services, and the company employs HAAG-certified professionals to evaluate roofs and identify potential problem areas.

The company notes that complete roof replacement is typically necessary every fifteen to twenty years, depending on the materials used. Routine maintenance is designed to extend a roof's lifespan and protect properties against leaks and other hazards. Roof inspections allow property owners to plan for future projects and address minor issues before they escalate.

"Regular inspections and timely repairs make a significant difference in how long a roof lasts," Collins said. "A HAAG-certified assessment gives property owners a clear picture of the condition of their roof and helps them make informed decisions about maintenance, repair, or replacement."

Beyond roofing, A&M Roofing provides gutter and siding services ranging from simple repairs to complete replacements. The company's contractors handle installation for new construction as well, ensuring that a home's first roof is built for durability.

The five-star reputation A&M Roofing has earned reflects consistent feedback from customers who have used its residential and commercial services over the years. The company continues to serve property owners with the same certified, insured, and materials-focused approach that has defined its work since its founding.

A&M Roofing is a roofing company based in McLean, Virginia, that has served the surrounding community for more than twenty years. The company offers new roof installation, roof replacement, roof repair, routine maintenance, gutter and siding services, and roof inspections for both residential and commercial property owners. Its technicians hold industry certifications, including HAAG certification, and carry the insurance required to perform their services.
