Riverbend Plumbing LLC Expands Water Heater Installation, Replacement and Repair Services Across Clay County

September 17, 2026

FLEMING ISLAND, FL - September 17, 2026 -
Riverbend Plumbing LLC has expanded its water heater installation, replacement and repair services to residential homeowners and commercial business owners throughout the whole of Clay County, Florida. The expansion extends coverage to the communities of Orange Park, Oakleaf Plantation, Fleming Island, Green Cove Springs, Middleburg, Lakeside and Asbury Lakes.

The expanded service area reflects growing demand for reliable water heater care among households and businesses in the region. The company services both traditional tank systems and tankless models, addressing common issues such as loud noises, inconsistent water temperature, leaks, rusty water and rising energy bills. Homeowners and business operators experiencing these warning signs can now access support across a broader portion of the county.

The Riverbend Plumbing LLC water heater experts handle gas and electric units, offering repair, full replacement and new installation for a range of property types. The company also maintains a yearly maintenance plan intended to help units run efficiently and reduce the likelihood of premature failure. This preventive approach aims to help property owners avoid unexpected disruptions and emergency situations.

"Water heater problems tend to arrive without warning, and residents across Clay County deserve dependable local support when they do," said Allen Danter, owner of Riverbend Plumbing LLC. "Extending coverage to Orange Park, Middleburg, Green Cove Springs and the surrounding communities allows the team to reach more households and businesses that need honest, timely service."

The company noted that the broader service area also supports its commercial clients, who often require prompt attention to keep operations running. Business owners in Oakleaf Plantation, Lakeside and Asbury

Lakes now fall within the expanded coverage for installation, replacement and repair work.

"The goal has always been straightforward work and clear communication," Danter added. "This expansion gives more families and business owners in the area access to the same standard of care the company has provided in Fleming Island and the wider Jacksonville region."

As BBB A+ rated professionals at Riverbend Plumbing LLC continue serving the county, the company emphasizes early attention to water heater issues as a way to prevent costly damage. Small warning signs, left unaddressed, often develop into larger failures that interrupt daily routines and business activity. The company encourages property owners to schedule inspections when they notice changes in performance.

Riverbend Plumbing LLC is a family-owned and operated plumbing company based in Fleming Island, Florida, serving both residential and commercial clients throughout the Jacksonville area. In addition to water heater services, the company provides drain cleaning, leak repair, home repiping, sewer line work, plumbing repairs and installations, remodeling, garbage disposals, sink faucets, tubs and showers, and around-the-clock emergency service. The business is licensed by the Florida Department of Business and Professional Regulation and was recognized as Best of Clay 2025 and 2026. Founded locally in 2019, the company operates under the ownership of Mr. Allen Danter and holds accreditation with the Better Business Bureau.
