

Ionox Cherry Potters Available on Sale This Weekend

June 07, 2016

June 07, 2016 - PRESSADVANTAGE -

Ionox will offer their Ionox cherry potters as part of an annual Father's Day Sale, which will begin this weekend. The pitters, now manufactured with zinc alloy bodies, are heavy-duty kitchen tools that are durable and make pitting cherries quick and easy, the company says. They also say the cherry pitter will make a great gift for dads who love to cook or simply enjoy the delicious bounty that summer cherry season has to offer.

The zinc alloy material of the pitters means that they are them stain-resistant. Zinc alloy makes the pitters more easy-to-use and last longer, a spokesperson says.

Customers are pleased with the speed of the product, reporting on Amazon about their ability to move quickly through a bowl of cherries.

Ionox says the pitters are a classic, yet updated redesign of the traditional cherry pitters, making them great for beginner chefs to advanced cooks. Other cherry pitters on the market, often made from plastic or aluminum, often feature a complex, two- or three-step process for pitting. The zinc alloy makes them durable, and new customers have reported being excited by the high-quality, with one customer saying that while the pitters are heavy-duty, they're not heavy, and that they work better than flimsy plastic pitters.

?We hope all the dads and granddads and special men being celebrated on Father?s Day will love their new cherry pitters! said an Ionox spokesperson.

Customers can purchase the Ionox pitter on Amazon. It is currently on sale for \$8.95, and is now available in both black and red. It comes with a 100% satisfaction guarantee. Visit <http://www.amazon.com/cherry-potter/dp/b00vca77oo/> to learn more or buy.
