

Ionox Recieving High Volume of Feedback on Digital Tire Gauge

June 08, 2016

June 08, 2016 -

Ionox has been receiving a lot of customer feedback recently, as a result of the launch of their durable, compact Ionox digital tire gauge. Users have been so excited about the product, they've even posted how-to use videos of their own on Amazon. Reviews feature headlines such as "Perfect Tool for Car Owners!!!", "Great handheld gauge."

Customers have been pleased with the durability of the 4.5 x 1.8 x 1 inch, 4-ounce maintenance tool, and how quickly it can read tire pressures. The gauge is ideal for use on car, bike, motorcycle, semi-tractor, commercial vehicle, ATV, RV, and tires.

The digital tire pressure gauge measures in four different scales. While it can measure down to 0.5 PSI, the Ionox ION-15S has a range of up to 150 PSI, 1,000 kPa, 10 Bar, or 10 kg/cm². The gauge is as accurate within +/- 0.5 PSI.

The gauge features a backlit display and blue, LED lit nozzle, which makes it convenient for nighttime use. This makes the gauge especially useful for commercial drivers, who often have to travel by night.

A great digital tire pressure gauge for overall use also features one-push operation. Customers press the button once to turn on, or repeatedly to switch to the desired measurement scale. To turn off the gauge, customers either hold the button in, or wait 30 seconds for automatic shut-off.

The tire pressure gauge is available now with a 100% moneyback guarantee. To learn more about it, and see more positive customer reviews, visit <http://www.amazon.com/digital-tire-gauge/dp/b00zur5jek/>.
