

Ionox Silver Tire Pressure Gauge in Silver Reviewed By Customers

June 09, 2016

June 09, 2016 -

Ionox has officially unveiled their ION-15B Ionox tire pressure gauge in silver. This device can measure tire pressure up to 150 PSI, 1000 kPa, 10 Bar, or 10 kg/cm² with selectable measurement types. Able to measure down to 0.5 PSI, it also exhibits an accuracy of +/- 0.5 PSI. The silver color is metallic, which makes it extra visible when stored in a customer's glove compartment or toolbox. Reviewers have purchased the product for both personal and commercial vehicles, as well as bikes and motorcycles.

A backlit digital readout provides measurements that can be read day or night. In addition, a blue LED light on the nozzle lights up, directing customers where to insert the gauge into the valve stem.

The Ionox ION-15B tire includes batteries. The gauge shuts off automatically after 30 seconds to preserve these batteries. Customers can also shut the tire pressure gauge off automatically, by holding in the button on the device.

Customers can benefit from free shipping if they spend more than \$49. The product also ships at no cost from Prime Orders. The product is now available for \$8.95, so ordering multiple gauges for vehicles, bikes,

semis, ATVs, trailers, and more, can help customers save money.

The best digital tire gauge for people with small or large hands, the compact, 4-ounce device can be used almost anywhere, as the LED lighting makes it simple to read any time of day or night. The gauge has a high rating on Amazon, and customers have reviewed durability of the product's die-cast metal, ergonomically designed case with rubberized, slip-proof grips.

A 100% satisfaction guarantee and warranty are included with each product purchase. The tire pressure gauge can be ordered now for \$8.95 on Amazon. Visit <http://www.amazon.com/tire-pressure-gauge/dp/b00zur5jek/>.
