

Tampa's Mane Center Now Officially Offering Acupuncture

June 08, 2016

June 08, 2016 - PRESSADVANTAGE -

Mane Center, a Tampa Florida based Chiropractor equipped with pain management, auto accident treatment, weight loss, chiropractic services, and functional medicine services, this week announced they have officially added acupuncture to their extensive list of quality and personalized services.

Acupuncture, a modality of Oriental medicine that extends back thousands of years, utilizes very fine, sterile, one-time use needles, and inserts them into specific points on the skin to adjust the flow of energy in the body. Through electromagnetic research today, the energy flows discovered by the Chinese through acupuncture have been officially confirmed.

When performed by a professional, acupuncture is a great holistic, non-invasive medical approach to alleviating pain and stress in the body, said Dr. Mane, Founder and Owner of the Mane Center. It is non-painful, and relaxing as the body's energy is aligned and released in a calming manner. As a practice that prides ourselves on targeted, efficient, and natural medical treatments, we are incredibly excited to add acupuncture to our repertoire.

Western medical research studies have shown acupuncture to stimulate the immune system, positively affect blood circulation, blood pressure, rhythm and stroke volume of heart, increase secretion of digestive juices, and so much more.

The Mane Center was founded by Dr. Nelson Mane, DC, MD, who is board certified in chiropractic orthopedics. He attended Chiropractic school in St. Louis, Missouri and has been a practicing physician for over 30 years.

In addition to the new acupuncture services, the Mane Center can accurately service any individual in need of Physical Therapy, Herniated Disc, Massage Therapy, Spinal Decompression, and more.
