

Garage Door Company Expands Service Presence

September 22, 2026

FORT SMITH, AR

FAYETTEVILLE, AR - September 22, 2026 -

Southwest Garage Door is highlighting its two-location operation in Arkansas, including its Fayetteville office at 5914 River Run, Fayetteville, AR 72704. The Fayetteville location provides the garage door company with an established operating base in Northwest Arkansas, while its Fort Smith office at 2206 Wheeler Ave. continues serving customers throughout the River Valley.

The two-location structure brings Southwest Garage Door's residential and commercial door services closer to customers across two major areas of its service territory. The Fayetteville office serves Northwest Arkansas communities, while the Fort Smith location maintains the company's longstanding presence in the River Valley.

Southwest Garage Door was founded in Fort Smith in 1981 by John and Cathy Martinkus. The company remained under their ownership until they retired in January 2021. Doug and Heather Walker acquired the business in February 2021 and have continued operating the company as a locally owned garage door provider.

The company's Fayetteville operation supports residential customers with garage door installation, replacement, repair, and maintenance services. Southwest Garage Door also works on garage door openers, including chain-drive, belt-drive, screw-drive, direct-drive, and smart opener systems.

Residential projects range from new construction to replacement and remodeling work. The company also handles custom residential garage door projects, giving homeowners options for properties with specific design or installation requirements.

Commercial services represent another significant part of the company's operations. Southwest Garage Door installs and services overhead doors for warehouses, manufacturing facilities, dealerships, firehouses, storefronts, and other commercial properties. Its commercial capabilities include sectional, rolling steel, high-speed, and specialty door systems.

The company also provides repair and maintenance services for commercial and residential door systems. Emergency repair services are available for customers experiencing problems with their garage doors or related equipment. In addition, Southwest Garage Door works with gate operating systems and commercial dock equipment.

The Fayetteville office extends the company's physical presence into Northwest Arkansas, where Southwest Garage Door serves communities including Fayetteville, Rogers, Bentonville, Springdale, Bella Vista, Siloam Springs, and surrounding areas. The Fort Smith office continues to serve the River Valley and nearby communities, maintaining the company's connection to the area where it was originally established.

Rather than operating as a single-location business, Southwest Garage Door now maintains offices in both Fort Smith and Fayetteville. This structure allows customers to contact a local office based on their location while accessing the company's residential, commercial, repair, and equipment services.

The company's history in Fort Smith remains an important part of its current operations. Since its founding in 1981, Southwest Garage Door has expanded its services to include residential garage doors, commercial overhead doors, openers, gates, and loading dock equipment. The business continues to serve both individual property owners and commercial customers across its regional territory.

The Fayetteville office is located at 5914 River Run, Fayetteville, AR 72704. The company's Fort Smith office is located at 2206 Wheeler Ave., Fort Smith, AR 72901. Customers can contact Southwest Garage Door through either location for information about garage door installation, replacement, repair, maintenance, and related services.

Additional information about Southwest Garage Door and its residential and commercial door services is

available at SWGD.com. The company provides service information for customers throughout Northwest Arkansas, the River Valley, and surrounding areas.
