

Geddie Tree & Land Services Expands Tree Service Coverage Across South Mississippi

October 16, 2026

ELLISVILLE, MS - October 16, 2026 -

Geddie Tree & Land Services, LLC, a family-owned company based in Hattiesburg, Mississippi, has expanded the availability of its full-service tree operations to homeowners and businesses throughout Hattiesburg, Laurel, Petal, and Richton, Mississippi. The expansion responds to demand for tree care across the region, where aging trees and frequent storm activity create ongoing maintenance needs for residential and commercial property owners.

With more than 26 years of experience in the field, the company provides a range of tree service options, including tree removal, tree pruning, stump grinding, and storm damage cleanup. An in-house licensed and certified arborist supports the operation by identifying tree diseases, advising on treatment, and reviewing trees slated for removal. This combination of field crews and arborist expertise allows the company to serve a variety of property conditions across South Mississippi.

Seasonal weather patterns in the region often leave trees weakened or damaged, and property owners

frequently require timely attention to protect structures and maintain safety. The company offers emergency tree services and same-day estimates for projects of all sizes, serving both residential and commercial clients. As a licensed and insured provider of local tree services, Geddie Tree & Land Services operates with an all-inclusive pricing structure.

"Trees in this part of Mississippi face a lot, from storm stress to disease and overgrowth, and property owners need a clear, honest approach to caring for them," said Jay Geddie, a representative of Geddie Tree & Land Services. "Extending coverage to communities like Richton and Petal lets the crews reach more neighborhoods that have waited for reliable help with pruning, removals, and cleanup after bad weather."

The company's tree service offerings cover tree takedown, trimming, shaping, and topping, along with chipping, mulching, and debris removal. Tree removal services include stump grinding for situations where trees interfere with new construction or threaten existing structures. Pruning work is performed for safety, tree health, and appearance, while storm damage cleanup helps property owners recover after severe weather events common to the area.

The company is co-owned by Jay Geddie, who manages commercial inquiries, and Jesse Geddie, who oversees residential projects. The structure allows each type of client to work directly with a representative familiar with their needs. The company maintains a competitive, all-inclusive pricing model and guarantees its work for customers throughout its service area.

"Every job, large or small, receives the same attention and turnaround that the community has come to expect," Geddie said. "Expanding into additional communities reflects the level of demand the team has seen across the region."

Property owners in Hattiesburg, Laurel, Petal, Richton, and surrounding communities can contact our team of experts today at (601) 498-8269 to request an estimate.
