

Ingersoll's Refrigeration Air Conditioning & Heating Highlights HVAC Services Ahead of Seasonal Demand

October 19, 2026

Fairhope, Alabama - October 19, 2026 -

Ingersoll's Refrigeration Air Conditioning & Heating is reminding homeowners and businesses across Fairhope, Daphne, Spanish Fort, and Foley, Alabama, to prepare their heating and cooling systems for the shift in seasonal weather. The family-owned contractor is drawing attention to its slate of HVAC Services as residents across Baldwin County look to maintain comfortable and efficient indoor environments throughout the year.

With more than 50 years of operation in the region, Ingersoll's AC & Heating provides repair, installation, and maintenance for all brands, makes, and models of air conditioning and heating systems. The company's offerings include a Spring and Fall Tune-Up that features a 28 Point Home Air Conditioning Inspection, giving property owners the opportunity to identify potential issues before systems face peak demand.

Seasonal transitions along the Gulf Coast often place added strain on residential and commercial cooling and heating equipment. By scheduling preventive maintenance during milder periods, homeowners and business

operators can reduce the likelihood of unexpected breakdowns during extreme temperatures. The company serves central air units, residential and commercial units, wall units, heat pumps, geothermal systems, and more.

"The change in seasons is the right time for area residents to have their systems inspected and serviced," said Becky Grizzle, a representative of Ingersoll's Refrigeration Air Conditioning & Heating. "A routine tune-up helps catch small issues early and keeps equipment running efficiently when it is needed most. Our goal is to help families and businesses throughout Baldwin County stay comfortable no matter the weather."

In addition to residential and commercial climate control, the company offers commercial refrigeration repair, commercial vent hood service, and home backup generator services. These offerings reflect the broad range of needs across the communities of Fairhope, Daphne, Spanish Fort, Foley, Point Clear, and the surrounding areas. The company's technicians are trained to address problems of any size, from routine maintenance to full system installations.

Grizzle noted that the company's long history in the area has allowed it to build lasting relationships with customers across generations. "Serving this community for over five decades has shaped how the company approaches every job," she said. "Reliability and honest work remain central to the way the team operates, and that commitment continues to guide the business today."

Ingersoll's also provides free estimates on new unit installations and can arrange routine maintenance plans for commercial or residential locations. Financing options are available to help make installations and repairs more manageable for property owners. An answering service remains available on weekends for customers who need assistance outside of standard operating hours. Residents interested in scheduling service can contact our team of experts today at (251) 928-9392.

Ingersoll's Refrigeration Air Conditioning & Heating is a family-owned and operated HVAC contractor based in Fairhope, Alabama. For more than 50 years, the company has served Baldwin County and the surrounding communities, including Daphne, Montrose, Spanish Fort, Point Clear, Gulf Shores, Foley, and Robertsdale. The company specializes in air conditioning and heating, commercial refrigeration repair, commercial vent hood service, and home backup generator services, operating under refrigeration license number 50520 and HVAC contractor number 83090.
