

# Huston Chevrolet Expands Low-Mileage Used Pickup Trucks Inventory for Sebring FL Shoppers

*November 04, 2026*

AVON PARK, FL - November 04, 2026 -
Huston Chevrolet, the Avon Park dealership serving the greater Highlands County region, has expanded its selection of low-mileage used pickup trucks for buyers seeking dependable work and family vehicles. The updated inventory focuses on trucks under 50,000 miles, giving area drivers access to recent-model pickups backed by warranty coverage.

The dealership reports growing demand for used pickup trucks near Sebring, FL, where many residents rely on trucks for agriculture, construction, towing, and daily commuting. In response, Huston Chevrolet has concentrated on stocking both GM Certified Pre-Owned trucks and CarBravo certified models, each of which carries warranty protection and completes a multi-point inspection before being offered for sale.

To help shoppers make informed decisions, the dealership has also published a buyer guidance resource explaining what low-mileage ownership means and how certification programs differ. The guide outlines the distinction between GM Certified Pre-Owned trucks, which are late-model Chevrolet vehicles meeting

manufacturer standards, and CarBravo certified trucks, which can include a broader range of makes that have passed inspection requirements.

"Truck buyers in this part of Florida want reliability they can count on, and that is exactly what the low-mileage focus is meant to deliver," said April J. Morin, a representative of Huston Chevrolet. "The goal is to make it straightforward for someone to find a well-maintained truck that fits both the budget and the demands of rural and working life in Highlands County."

The dealership, located roughly 20 minutes from Sebring, carries pickups from multiple manufacturers within its pre-owned lineup, including Chevrolet, Ford, Ram, and GMC. Each vehicle listing includes details such as mileage, model year, features, and stock number, allowing buyers to compare options before visiting in person. Shoppers can browse the full used truck inventory and review individual vehicle histories as part of the research process.

Morin noted that the inspection process is central to the dealership's approach. "Every truck goes through a thorough inspection and servicing before it reaches the lot, so customers understand the condition of what they are considering. Transparency during the shopping process matters as much as the vehicle itself."

Along with its expanded truck inventory, Huston Chevrolet continues to offer vehicle financing through partnerships with several financial institutions, as well as trade-in valuation and pre-qualification options for qualified buyers. The dealership also maintains a service and parts department that handles regular maintenance, repairs, and genuine Chevrolet parts.

Huston Chevrolet is a full-service automotive dealership based in Avon Park, Florida, serving drivers throughout the Highlands County area. The dealership sells new and used Chevrolet cars, trucks, and SUVs, along with used vehicles from a range of additional manufacturers. Its services include new and pre-owned vehicle sales, financing, routine maintenance and repairs, and genuine parts and accessories. The dealership also provides online tools for inventory searches, trade-in estimates, and service appointment requests, supporting customers throughout the ownership experience.
