

Central Plumbing, Heating &Air Conditioning Expands Heater Repair Support Across Bucks and Montgomery Counties

September 23, 2026

Upper Southampton Township, Pennsylvania - September 23, 2026 -
Southeastern Pennsylvania winters place sustained demand on residential and commercial heating systems, and Central Plumbing, Heating & Air Conditioning is addressing that seasonal strain with heater repair services across Bucks County and Montgomery County. The region's geographic variation, from the higher elevation of Doylestown to the lower-lying areas near Levittown, combined with humidity along the Delaware River corridor, creates a wide range of heating challenges for homeowners and businesses heading into the coldest months.

In operation since 2001, the company serves communities including Yardley, Newtown, New Hope, Chalfont, Perkasie, Quakertown, Warminster, Southampton, Feasterville, and Warrington. Its heater repair work centers on furnace repair, targeting common failure points such as ignition system failures, blower motor malfunctions, cracked heat exchangers, thermostat problems, and pilot light difficulties. The company applies an advanced diagnostic process built to identify root causes rather than treat symptoms, an approach intended to reduce recurring service calls.

Beyond furnace work, the company provides boiler repair and maintenance across natural gas, heating oil, and propane-fueled systems. A replacement program supports homeowners upgrading to high-efficiency units that may qualify for available tax credits or utility rebates. For households looking to move away from oil heat, the company offers oil-to-gas furnace conversion services.

Heat pump repair rounds out the heating lineup, addressing refrigerant leaks, defective reversing valves, and frozen outdoor coils. The company notes that these conditions can be worsened by the regional humidity and temperature swings common throughout the service area.

"Winter heating problems rarely arrive at a convenient hour, and the range of systems across this region means no two heater repair calls look exactly alike," said a spokesperson for Central Plumbing, Heating & Air Conditioning. "The focus is on finding the underlying cause of a failure so a home stays warm without the same issue returning weeks later."

The company operates 24/7 emergency response, with a stated response time under 60 minutes throughout the service area. It provides upfront pricing with no hidden fees, and its technicians are NATE-certified and Pennsylvania-licensed.

"Homeowners in towns from Doylestown to Levittown face different heating demands, and clear, upfront pricing helps them make informed decisions during an already stressful situation," the spokesperson added.

Heater repair remains a core concern for property owners as temperatures drop, and the company positions its services alongside related furnace repair, boiler repair, and heat pump repair work to cover the full range of heating equipment found in the area. Central Plumbing continues to serve both residential and commercial customers as part of a broader set of plumbing, heating, air conditioning, and remodeling services.

Central Plumbing, Heating & Air Conditioning is based in Southampton, Pennsylvania, and has served Bucks County and Montgomery County since 2001. The company provides plumbing, heating, air conditioning, and remodeling services to homeowners and businesses across southeastern Pennsylvania.

To schedule service, contact Central Plumbing, Heating & Air Conditioning at 215-322-6884. The company is located at 950 Industrial Blvd, Southampton, PA 18966, and is open 24 hours a day, seven days a week.
