

GAF Master Elite Certified Roofing Contractor Increases Trucks And Crews

June 15, 2016

June 15, 2016 - PRESSADVANTAGE -

Elevated Roofing is a GAF Master Elite Certified Roofing Contractor based in Frisco, TX, and they are proud to announce that they have doubled the number of trucks and crews since January 2016 that serve the Frisco, Plano, and McKinney area. The company is committed to being available to the community as and when needed, particularly now that the weather can cause significant damage to people's roofs. Thanks to their extended crew, they are now able to offer free roof inspections as well.

Mike Witte, owner of Elevated Roofing, says: "This year's storms have been some of the worst yet, and it doesn't look like it is going to get any better soon. In fact, this is a global phenomenon. While we are unable to save the world, we can make sure that property owners in our community are safe, and by expanding our trucks and crew, we are now able to reach a larger geographical area."

Concerned home owners are encouraged to contact Elevated Roofing as soon as possible to take advantage of their free roof inspection. Alternatively, if they have sustained damage due to a recent storm, the company

can come out very quickly to inspect. The company's quality and commitment to excellence is expressed in the fact that they are a GAF Master Elite Certified Roofer. Only 3% of roofer in the country achieve this prestigious certification.

"I really want to encourage people to schedule a free roof inspection today," adds Mike Witte. "A lot of people don't even know that there is damage present already, until the next storm hits and the entire roof is destroyed. When we complete an inspection, we will provide advice on what the best way forward is, if there is indeed any damage, and this can help people avoid more damage, and higher bills, later on."

Elevated Roofing's hail & storm damage repair services are in incredibly high demand. There have been some significant rain storms over recent months and weeks, and the forecast is for more to follow. The damage these storms have caused have already cost insurance companies and individuals thousands of dollars.

Home or business owners interested in learning more or connecting with the company on a more personal level can do so on the Elevated Roofing Company Facebook Page or visit them on their official website for a complete list of services and service areas.

For further information about Elevated's memberships, certifications and community involvement, contact James Baron at Elevated Roofing or reach Scott Berry at MarketCrest.
