

AgencyCon Announces E2M Solutions as Gold Sponsor for 2026 Denver Conference

September 29, 2026

Denver, Colorado - September 29, 2026 -

AgencyCon announced E2M Solutions as a Gold sponsor of its 2026 conference, scheduled for Oct. 8-9 at the Children's Museum of Denver at Marsico Campus.

AgencyCon is a two-day event for digital marketing agency owners, operators, and leaders. Hosted by Hyper Dog Media, the conference will feature sessions on agency growth, premium positioning and pricing, demand generation, process automation, team development, and operational efficiency.

As part of the sponsorship, Brent Weaver, chief executive officer of E2M Solutions, is scheduled to present "Building an Agentic Agency" on Thursday, Oct. 8, at 10 a.m. The session will examine ways agency leaders can incorporate AI into internal operations and client-service offerings.

For agency leaders, the AI conversation is shifting from individual tools to how the technology changes the agency operating model itself. Agencies are exploring AI agents and automated workflows for research,

reporting, production, project management, and other recurring work, while clients increasingly expect their agency partners to understand and apply AI to their businesses. These shifts raise broader questions about team structure, capacity, margins, and how agencies create value for clients. They also create opportunities for agencies to develop new AI-related services as businesses look for practical ways to adopt the technology.

E2M Solutions provides white-label website design and development, SEO, PPC, AI solutions, and related services to marketing and digital agencies. Its services are delivered for agency partners to offer under their own brands.

"AgencyCon is designed to give agency leaders practical ideas they can apply in their businesses," said Jim Kreinbrink, President of Hyper Dog Media and founder of AgencyCon. "E2M's work with agency partners and Brent's perspective on AI operations make the company an excellent addition to this year's program. As agencies look to innovate and scale, they'll want to look at what E2M solutions offers. E2M helps digital agencies automate operations to deliver more with less, and build white label AI services that create recurring revenue streams."

"We are looking forward to joining the AgencyCon community in Denver," Weaver said. "The event creates an opportunity for agency leaders to discuss the operational and service-delivery changes shaping the industry. E2M solves a specific problem for agencies: delivering marketing services, development, and AI solutions under an agency's own brand, so agencies can scale without adding headcount. With more than 100 AI automations built specifically for agencies, 15,000 websites delivered, and millions in managed media spend, E2M brings deep delivery experience to growth-focused agencies looking to scale."

Weaver continues "The sponsorship reflects E2M's focus on supporting agencies as they navigate changing client expectations, capacity challenges, and the growing impact of AI on agency operations and delivery. Because E2M works exclusively with agencies rather than directly with end clients, AgencyCon brings together the community E2M was built to serve. Tyler Mandroian, Marketing Director at E2M, said the sponsorship reflects a straightforward priority: showing up where agency leaders are making decisions about how they scale."
