

Auto Glass Stars Expands Mobile Windshield Installation for Drivers Facing Cracks and Road Debris Damage

September 28, 2026

SAN TAN VALLEY, AZ - September 28, 2026 -

Auto Glass Stars, an auto glass shop serving San Tan Valley, Arizona, has expanded its mobile services to bring windshield repair and replacement directly to drivers contending with cracks, chips, and road debris damage. The move addresses a common concern among Arizona motorists, whose vehicles are frequently exposed to flying rocks and highway debris that can compromise windshield integrity.

With Auto Glass Stars windshield installation now available at homes and workplaces, area drivers no longer need to arrange transportation to a physical shop to address damaged glass. The mobile format allows technicians to travel to a customer's location, assess the damage, and complete the work on-site, whether the situation calls for a small chip repair or a full windshield replacement.

Chips caused by rocks are among the most frequent issues technicians encounter. When addressed early, these small points of damage can often be repaired in approximately 45 minutes, before they spread into

larger cracks that require a complete replacement. The company treats windshields not only as a visibility component but as a structural safety element that helps protect passengers during a collision.

"Windshield damage rarely happens at a convenient time, and many drivers put off repairs because getting to a shop feels like a burden," said John Schmidt of Auto Glass Stars. "Bringing the service to the customer removes that obstacle. A rock chip handled early can save a driver from needing a full replacement later, and our technicians can take care of it in a driveway or a parking lot at the office."

For situations where a windshield cannot be repaired, the company provides replacement glass that meets or exceeds original equipment manufacturer safety requirements. Auto Glass Stars also works directly with insurance companies to handle payment, reducing the administrative steps involved for vehicle owners. The mobile service extends to other auto glass needs as well, including door windows, rear windows, moonroofs, and shattered side glass that can leave a vehicle exposed.

Beyond glass repair and replacement, the company offers window tinting using ceramic window film installed with infrared heat rejection, a service suited to the Arizona climate. The tinting is intended to help maintain interior temperatures, reject solar radiation, and shield vehicle interiors from UVA and UVB rays. The company provides a lifetime warranty on its ceramic tint.

"Our goal is to get vehicles back on the road quickly and safely," Schmidt added. "Whether it is a chip, a full replacement, or tinting to handle the desert sun, the priority is convenience for the driver without cutting corners on quality."

Auto Glass Stars is an auto glass shop based in San Tan Valley, Arizona, offering windshield repair, windshield replacement, mobile auto glass service, and window tinting. The company works on a wide range of vehicle makes and models and stands behind its work with lifetime assurances on repairs and ceramic tinting. Recognized in the local auto glass industry, Auto Glass Stars serves both residential and commercial customers throughout the surrounding area.
