

Dinardo Tree Care Expands Tree Services by Certified Arborists

October 02, 2026

Dallas, TX - October 02, 2026 -

Dinardo Tree Care has expanded its arborist and tree trimming services throughout the Greater Dallas area, extending professional tree maintenance to communities that include Dallas, Highland Park, Preston Hollow, Lake Highlands, Lakewood, Coppell, and Highland Village. The expansion responds to rising demand for specialized tree care across North Texas, where seasonal stress and demanding growing conditions place ongoing pressure on established trees.

The expanded offerings cover a full range of services, including tree trimming, selective pruning, deep root fertilization, air spading, tree healthcare and diagnosis, insect and disease control, water management, tree and stump removal, tree support systems, and storm damage recovery. Each service is led by an ISA Certified Arborist and follows the ANSI A300 Tree Care Standards, which are approved by the American National Standards Institute and recognized within the United States civil court system as the benchmark for professional tree work.

The broadened coverage reinforces the availability of Highland Park tree services and surrounding communities, where mature tree canopies require consistent, science-based maintenance. The company develops customized tree care plans based on the specific condition of each property and serves both commercial and residential clients.

Jared Dinardo, founder of Dinardo Tree Care, pointed to the distinction between routine branch cutting and the application of arboricultural science to living trees. "There is a meaningful difference between cutting branches and treating a tree as a living organism," Dinardo said. "Trees in North Texas face heat, drought, soil compaction, and storm stress throughout the year, and each one responds differently. The goal of this expansion is to bring individualized, standards-based care to more properties across the region."

The company emphasizes all-natural tree care, growth, and wellness through organic treatments, proven techniques, and certified training. Its diagnostic approach begins with an assessment of tree health and structural integrity before any work is scheduled, allowing recommendations to be matched to the species, age, and setting of each tree.

Dinardo noted that adherence to recognized standards remains central to the company's work as it reaches additional communities. "Following the ANSI A300 standards means every recommendation can be measured against an established professional benchmark," Dinardo said. "As more neighborhoods gain access to our arborists tree trimming and related services, that consistency becomes even more important."

Services range from preventive maintenance, such as deep root fertilization and water management, to recovery work following severe weather. Air spading is used to relieve compacted soil around root systems, while tree support systems help stabilize larger specimens. Insect and disease control and ongoing healthcare and diagnosis round out the maintenance options available to property owners throughout the expanded service area.

Dinardo Tree Care is a tree care company serving the Greater Dallas area, including Dallas, Highland Park, Preston Hollow, Lake Highlands, Lakewood, Coppell, and Highland Village. The company specializes in maintaining the health and wellness of trees through organic treatments, proven techniques, and certified training, and its work is led by an ISA Certified Arborist operating in accordance with the ANSI A300 Tree Care Standards. Dinardo Tree Care provides both commercial and residential services with customized care plans developed for each property.
