

Keathley Landscaping Expands Residential Drainage Company Services Across North Texas Communities

October 14, 2026

GARLAND, TX - October 14, 2026 -

Keathley Landscaping, a NDS Certified Drainage Contractor serving North Texas, has expanded its specialized residential drainage services to help homeowners address complex yard drainage and flooding issues before seasonal rains arrive. The company, led by certified contractor Logan Keathley, provides custom-engineered solutions for properties experiencing standing water, erosion, and poor grading.

Yard drainage problems represent a significant concern for homeowners because resulting water damage to foundations and structures is often not covered by standard homeowners insurance policies. Improper grading and inadequate drainage can lead to flooding, soil erosion, and costly structural repairs, making proactive drainage planning an important consideration for property owners throughout the region.

The expansion reflects growing demand for professional drainage solutions in communities including Lowry Crossing, Plano, Fairview, Allen, Lucas, Rockwall, Parker, Murphy, Richardson, and Frisco. As a Plano drainage company with NDS certification, Keathley Landscaping brings standardized industry practices and

specialized equipment to each project, developing tailored plans based on detailed assessments of individual properties.

Services range from French drain installation and yard grading to large custom-designed, buried drainage pipelines engineered for properties with severe water management challenges. Each project begins with a detailed lawn evaluation to identify the underlying causes of water accumulation and determine the most appropriate remedy.

"Every property presents a different set of conditions, and effective drainage work starts with understanding exactly how water moves across a site," said Logan Keathley, founder and certified drainage contractor at Keathley Landscaping. "The goal is to find practical, lasting solutions rather than temporary fixes. A proper drainage plan protects a home and gives the owner peace of mind during heavy rain."

The company's certification as a NDS Certified Drainage Contractor indicates completion of training in drainage system design and installation using established industry standards. This credential supports the company's work on both straightforward grading corrections and complex subsurface drainage systems.

Homeowners experiencing recurring flooding frequently discover that surface symptoms point to deeper structural drainage issues. Addressing drainage Lowry Crossing residents and surrounding communities face often requires a combination of approaches, including regrading, French drains, and custom piping routed to direct water safely away from foundations and living spaces.

"Drainage challenges tend to worsen over time if left unaddressed," Keathley added. "Water that pools near a foundation today can become a far larger and more expensive problem next season. Identifying and correcting the source early makes a meaningful difference for homeowners."

Beyond drainage, Keathley Landscaping offers a full range of outdoor services, including sod installation, landscape lighting, stonework and retaining walls, flowerbeds and hardscapes, landscape design and installation, fence repair and installation, patio covers, outdoor kitchens, firepits, and tree trimming and removal.

Keathley Landscaping is a full-service landscaping and drainage contractor serving Dallas, Plano, Garland, Wylie, Lowry Crossing, and surrounding North Texas communities. In operation since 2002, the company specializes in residential drainage solutions, landscape design and construction, and outdoor living installations, with a focus on durable workmanship and customized project planning.
