

822 Heat and Air Expands Commercial HVAC Company Installation and Repair Services

October 20, 2026

Benbrook, TX - October 20, 2026 -

822 Heat and Air has expanded its commercial HVAC installation and air conditioning repair services across the Greater DFW Metroplex, extending comprehensive system solutions to a growing base of commercial and residential clients throughout the region. The expansion addresses rising demand for energy-efficient climate control systems among businesses and homeowners in North Texas.

The company specializes in complete HVAC installation for both large-scale commercial projects and residential properties. Its expanded commercial offerings include high-efficiency central air systems, rooftop units, split systems, ventilation solutions, ductwork design, heat pump systems, chiller systems, and building automation systems. As a provider of commercial hvac fort worth businesses rely on, the firm covers installation, repair, maintenance, and full system replacement.

Alongside its commercial work, 822 Heat and Air continues to deliver residential heating and air conditioning services, including routine maintenance checks, specific repairs, full system replacements, and emergency

air conditioning repair. The company's licensed technicians handle tasks ranging from condenser and coil servicing to complete system installation when a unit is beyond repair.

David, a spokesperson for 822 Heat and Air, said the expansion reflects changing needs across the commercial sector. "Commercial facilities across the region are seeking systems that reduce operational costs while maintaining consistent comfort for occupants," David said. "The expansion of installation and repair services allows the company to support those facilities with solutions tailored to each building and its specific demands."

The company places a priority on energy efficiency across its projects. Its technicians focus on solutions designed to lower operational costs and reduce environmental impact, an approach that applies to both new installations and system upgrades. Support covers the full project lifecycle, from initial consultation through post-installation maintenance.

As an established HVAC company, 822 Heat and Air operates with a team of certified technicians who manage installation, diagnostics, and ongoing service for commercial and residential systems alike. The firm is licensed under number TACLA65080C and is insured. Financing is available subject to credit approval and offer eligibility, with terms arranged directly between the customer and the chosen finance company. 822 Heat and Air is neither a broker nor a lender and does not assist with, counsel, or negotiate financing.

"Each installation begins with an assessment of the facility rather than a standard template," David said. "That process helps ensure systems are sized and configured correctly, which contributes to long-term reliability and efficiency for the client."

The expanded services are available throughout a wide service area that includes Fort Worth, Crowley, Burleson, Benbrook, Granbury, Joshua, Godley, Cleburne, Alvarado, Arlington, Dallas, and the surrounding suburbs of the Greater DFW Metroplex. The company serves clients in both urban centers and outlying communities within this region.

822 Heat and Air is a heating and air conditioning contractor providing both commercial and residential services across North Texas. The company offers commercial HVAC, residential HVAC, ductwork, and air conditioning tune-up services, with an emphasis on energy-efficient systems and personalized solutions. Its work spans installation, repair, maintenance, and replacement for buildings throughout the Greater DFW Metroplex and surrounding suburbs.
