Carolina Signs and Wonders Introduces New Cabinet Sign Upgrade Program

October 14, 2026

GREENSBORO, NC - October 14, 2026 -

Carolina Signs and Wonders, a full-service commercial sign company serving Greensboro, North Carolina, is introducing a new Cabinet Sign Upgrade Program designed to help businesses modernize their existing exterior signage. The initiative focuses on LED illumination upgrades, replacement sign faces, updated branding, and custom cabinet sign fabrication for commercial properties throughout the Piedmont Triad.

The new program provides businesses with an alternative to completely replacing existing signage when upgrading outdated storefront signs or implementing new corporate branding. By evaluating existing sign structures and identifying opportunities for modernization, Carolina Signs and Wonders aims to help commercial property owners make informed decisions about exterior signage investments. The initiative is designed for retail establishments, restaurants, healthcare facilities, shopping centers, professional offices, and other businesses seeking to update their building identification.

A central component of the new program is the modernization of existing illuminated cabinet signs using LED lighting technology. Traditional cabinet signs frequently rely on fluorescent lighting systems that can require periodic maintenance and replacement components. Modern LED illumination offers an alternative that can

reduce electricity consumption and provide more consistent lighting across sign faces.

Carolina Signs and Wonders' new program focuses on evaluating existing cabinet signs to determine whether their structures can accommodate updated lighting components. For businesses requiring completely new signage, the company offers custom-fabricated illuminated cabinet signs featuring aluminum construction, translucent sign faces, and LED lighting systems. Customers can select different cabinet dimensions, mounting configurations, illumination options, and graphic finishes according to branding requirements and property specifications.

Beyond lighting upgrades, the program addresses businesses seeking to update exterior branding without necessarily replacing their entire sign structures. For qualifying existing cabinet signs, replacement sign faces can incorporate updated company logos, colors, and graphics while retaining suitable structural components. This approach may be particularly useful for businesses undergoing ownership changes, corporate rebranding initiatives, or storefront renovations.

For shopping centers and multi-tenant commercial developments, interchangeable cabinet sign faces can also simplify updates when tenants relocate or new businesses occupy existing retail spaces. When existing cabinets are unsuitable for modification, Carolina Signs and Wonders can develop replacement signage designed to accommodate updated branding and installation requirements.

The Cabinet Sign Upgrade Program introduces a coordinated approach to evaluating, designing, and installing updated commercial signage. Projects begin with an assessment of existing signage, building characteristics, electrical requirements, and applicable local regulations. Based on the evaluation, customers can explore options ranging from replacement sign faces and lighting upgrades to complete cabinet sign fabrication and installation.

The company also provides permitting assistance when modifications or new installations require municipal approval. Coordinating these stages through one signage provider is intended to simplify project management for business owners and commercial property managers.

The expanded cabinet signage program is intended to serve businesses throughout Greensboro and surrounding Piedmont Triad communities, including High Point, Winston-Salem, Burlington, and Jamestown. In addition to individual storefront sign projects, the program accommodates commercial property owners managing signage updates across multiple locations.

Carolina Signs and Wonders is a full-service commercial sign company serving Greensboro, North Carolina,

and the surrounding Piedmont Triad. The company specializes in custom cabinet signs, illuminated channel letters, monument signs, LED signage, building signs, and interior identification systems. Its services include custom sign design, fabrication, permitting assistance, installation, and maintenance for businesses and commercial property owners throughout North Carolina and South Carolina.
