Crown Plumbing & Water Damage Restoration Expands San Antonio TX Plumber Services With Two New Locations and Disaster Relief Program

October 02, 2026

SAN ANTONIO, TX - October 02, 2026 -

Crown Plumbing & Water Damage Restoration has announced the expansion of its combined plumbing and restoration services across the San Antonio area, adding two new locations and launching an annual disaster relief support program for local families affected by fire and major property disasters.

The company has opened a new location on George Road in San Antonio and a second new location in Selma, Texas. The additional sites are intended to reduce response times for emergency calls and to serve a broader portion of the region. The expansion coincides with the integration of water damage restoration services alongside the company's established plumbing operations, allowing a single provider to address both the source of a leak and the structural damage that follows.

Through the newly formalized annual disaster relief support program, Crown Plumbing & Water Damage Restoration will provide comprehensive plumbing and restoration assistance to a family significantly impacted by a fire or other major disaster each year. The program reflects a growing industry emphasis on coordinated recovery services, in which cleanup, repair, and reconstruction are managed together rather than through

separate contractors.

"Water intrusion and structural damage often begin with a plumbing failure, so handling both the plumbing repair and the restoration under one roof shortens the recovery timeline for property owners," said Jeremy Newman, Operations Director at Crown Plumbing & Water Damage Restoration. "The two new locations position the team to reach more households quickly when an emergency occurs."

The company's restoration division includes water damage restoration, fire damage restoration, mold remediation and testing, sewage cleanup, asbestos removal and testing, and home remodeling and reconstruction. Its plumbing division covers installation, repair, water heater services including tankless systems, inspections and maintenance, and a range of drain and sewer services such as drain cleaning, hydro jetting, roter services, sewer line inspection, and sewer line replacement.

Emergency plumbing and water damage restoration services are available around the clock. According to the company, disasters rarely follow a schedule, and the combination of expanded coverage areas and continuous availability is designed to address that reality.

"Adding the disaster relief program allows the company to give back to the community it serves while applying the same expertise used in everyday plumbing and restoration work," Newman said. "Recovering from a fire or flood is difficult, and coordinated support can make a meaningful difference for a family during that process."

The integration of restoration services with traditional plumbing work addresses a common gap in the recovery process, in which property owners must manage multiple vendors after a single incident. By consolidating leak repair, cleanup, remediation, and reconstruction, the company aims to streamline the path from emergency to full restoration.

Crown Plumbing & Water Damage Restoration is a San Antonio, Texas-based company offering plumbing and damage restoration services throughout the surrounding region. Its offerings span emergency and scheduled plumbing work as well as fire, water, mold, sewage, and asbestos restoration, supported by home remodeling and reconstruction capabilities. With the addition of locations on George Road in San Antonio and in Selma, the company continues to broaden its service footprint across the area.
