

Regal Pest Management Acquires Royal Flush Pest Control

May 22, 2014

May 22, 2014 -

Thornwood, New York - The highly respected pest control company, Regal Pest Management, recently announced its acquisition of Royal Flush Pest Control. The company expansion means Regal Pest Management is operating in five New York counties: Westchester, Putnam, Bergen, Hudson, and Manhattan. Royal Flush is now serving customers under the Regal Pest Management name.

For more than 20 years, Regal Pest Management has set industry standards as a NY pest control service that emphasizes responsible pest control. The professional company team uses its years of experience to develop programs that effectively eliminate pests with a minimal environmental impact. This means nuisance bugs and rodents are exterminated without putting pets, children, and the environment at unnecessary risk.

Regal Pest Management successfully treats commercial, industrial, institutional, and residential properties. Residential customers benefit from the company's local experience protecting homes from common pests in their area. Regal Pest Management employs only highly trained and experienced technicians. This means homeowners can enjoy the confidence of a professional exterminator who will choose the right products and methods to remove pests safely.

The experts at Regal Pest Management recognize that all pest infestations are not the same. Drawing on years of professional experience enables the company to tailor design service to meet the needs of customers. This can be done as part of a one-time service to exterminate pests or, for longer-term security, within one of the recurring service programs the company offers.

Regal Pest Management offers a variety of service programs for residential customers. Homeowners can ensure the safety and value of their property by protecting it from pests with monthly, seasonal, or premium program options. The custom designed monthly program is particularly effective for properties that have had pest problems in the past. The seasonal program is especially suited to prevent common insects, rodents, and other pests from infiltrating a home. The premium program, for customers who want the highest possible level of protection, includes everything in the other options plus termite control. Additional details about how

Regal Pest Management provides protection for residential customers can be found on the company's helpful website <http://www.regalpest.net/residential-services/>.

Regal Pest Management gets great customer reviews for its smart, safe, and effective approach to pest control services. Now that the company is serving the Manhattan area, many more business and homeowners can benefit from the responsible pest control method.
