

## **Dania Beach Acupuncture Clinic Now Accepts Medical Insurance For Acute And Chronic Pain**

*July 08, 2016*

July 08, 2016 - PRESSADVANTAGE -

Dania Beach, FL massage therapy and acupuncture clinic, The Local Healing Room has announced that they now accept medical insurance for both acute and chronic pain. Insurance benefits cover both massage therapy and acupuncture. Their acupuncture services have been proven to be particularly beneficial for pain relief, substance addiction, and lymphedema.

Erin T. Murphy, founder and owner of The Local Healing Room, says: "The common acceptance of acupuncture as a medical treatment has led to an increase in health insurance companies covering the treatment. When I decided to attend medical school, I never imagined that I would end up as an acupuncturist. As of now, we are considered primary care providers and we have many responsibilities to our patients."

As part of the expanding responsibilities, the acupuncture clinic has also launched a new website, as well as a social media campaign. This includes Facebook and Yelp. In so doing, the clinic is better able to reach potential patients, whether they are looking for acupuncture services or massage therapy. Murphy herself is highly educated and certified in the fields of massage therapy and acupuncture, as are her colleagues Katie

Fife and Paul Lopez.

Committed to ensuring people are able to achieve greater overall health and well-being, the clinic is incredibly proud to achieve primary care status and accept medical insurance. "Acupuncture is a great technique to control chronic and acute pain and it was vital that we accepted health insurance to help as many people as possible," adds Erin T. Murphy.

People are encouraged to like The Local Healing Room's Facebook page. This will provide them with further information about the different therapists offering treatment, and also about medical insurance, and more. Furthermore, it gives people the opportunity to discuss their experiences with the clinic and their services, and how they have benefited from the treatment.

Those who believe they are entitled to medical insurance coverage for the treatment they received are encouraged to complete the relevant form on The Local Healing Room's website. This will enable the clinic to find the exact benefits covered by individual insurance plans.
