

Houston SEO Consultant Now Fully Open To The Public

June 15, 2016

June 15, 2016 - PRESSADVANTAGE -

Nova Marketing, an SEO consultancy business in Houston, TX, is proud to announce that they are now fully open to the public. In the past, they only worked by referral. Using that time to build their expertise, they now feel ready to be fully open. Interested clients are encouraged to complete the discovery form at <http://novamarketing.net/discovery> for further information.

Quinn Bond from Nova Marketing says: "We wanted to make sure that the services we offer are truly the best. This is why, for some time, we only accepted new clients if they were referred to us. We learned a lot from that, and we achieved many successes, so we now feel ready to take on other clients as well. We're happy to see that there is already a lot of interest in our work."

While now fully open to the public, Nova Marketing continues to be very selective in terms of the businesses they do and do not choose to work with. This is because they want to be able to ensure that their clients actually achieve their goals. Bond wants to be able to spend the right amount of time on each client, which means he does not just accept any new request that comes through the website.

"I work with businesses that already have a robust and lively business," adds Quinn Bond. "I do not work with get rich quick models, the adult industry, MLMs, and startups. Furthermore, I work solely with those who have

a brick and mortar business and already have a reasonable customer database. Lastly, I only work with those who already have an honest reputation and a solid product or service."

Nova Marketing aims to set itself apart as a personal SEO expert for each client. They provide clients with the personalized attention they need, in order to ensure they are able to meet their SEO goals. In terms of services, the company offers SEO, local SEO, social media marketing, advanced web analytics, email marketing, pay per click, and content strategy. This is done on a case by case basis, rather than on a one size fits all scheme.
