

Zahnarzt Basel Expands Expert Emergency Dentistry Services Available 365 Days a Year

October 19, 2026

Basel, Basel-City - October 19, 2026 -

Zahnarzt Basel has expanded its emergency dental care services, offering treatment for urgent dental issues every day of the year at its practice located in Basel City near the Basel SBB railway station. The clinic addresses situations such as severe toothaches, broken teeth, loose crowns, and dental accidents that require immediate professional attention.

The practice operates 365 days a year, providing patients throughout Basel with access to timely dental care when unexpected problems arise. Its central location near Basel SBB makes the clinic reachable for residents and commuters alike, reducing travel time during dental emergencies when prompt treatment is often essential.

Alongside emergency care, Zahnarzt Basel delivers a comprehensive range of dental services. These include dentistry for children, dental implants, prophylaxis and preventive cleanings, and the diagnosis and treatment of craniomandibular dysfunction (CMD), a condition affecting the muscles and joints connecting the jaw to the

skull. The clinic maintains an in-house dental laboratory, allowing it to produce certain solutions quickly and support immediate treatment during urgent cases.

The practice places particular emphasis on patients who experience dental anxiety, as well as families and children who may require specialized attention during emergencies. By combining modern dental techniques with a patient-first approach, the clinic aims to make emergency visits as straightforward and reassuring as possible. Information regarding the practice can be found at storage.googleapis.com/local-business-services/Zahnarzt-Basel-Notfall.html.

Dr. Jacques Schultheiss, lead dentist at Zahnarzt Basel, noted the importance of consistent availability for dental emergencies. "Dental emergencies rarely happen at convenient times, which is why the practice remains open every day of the year," said Dr. Schultheiss. "The goal is to ensure that anyone in Basel facing sudden pain or injury can receive professional attention without unnecessary delay."

The clinic also provides clear information about the costs associated with emergency treatment, helping patients understand what to expect before care begins. This transparency supports informed decisions during stressful situations and reflects the practice's broader focus on accessible care.

Dr. Schultheiss added that preventive care remains a central part of the practice's work. "Managing small problems early through regular prophylaxis and check-ups helps many patients avoid emergencies altogether," he said. "Prevention and emergency readiness work together to support long-term oral health."

Further details about the practice and its emergency services are documented at pressadvantage.com/story/82390-zahnarzt-basel-offers-24-7-emergency-dentist-services-and-comprehensive-oral-solutions.

Zahnarzt Basel is a dental practice based in Basel, Switzerland, specializing in emergency dental care and immediate assistance for dental concerns. The clinic offers emergency services, children's dentistry, dental implants, prophylaxis, and treatment for craniomandibular dysfunction. Operating 365 days a year with an in-house dental laboratory, the practice serves patients from its location near the Basel SBB railway station, with a focus on families, children, and individuals who experience dental anxiety.
