

822 Heat and Air Expands Commercial HVAC Installation and AC Repair Services

October 27, 2026

Benbrook, TX - October 27, 2026 -
822 Heat and Air has expanded its commercial HVAC installation and air conditioning repair services across the Greater Dallas-Fort Worth Metroplex, broadening the range of options available to businesses seeking reliable climate control solutions. The expansion reflects growing demand among commercial property owners for comprehensive heating, ventilation, and air conditioning support delivered by licensed technicians.

The company, a commercial and residential heating and air conditioning contractor, specializes in complete HVAC installation for both large-scale commercial clients and residential customers. With the expanded offering, 822 Heat and Air now provides broader support for central air systems, rooftop units, split systems, ventilation solutions, ductwork design, heat pump systems, and building automation systems throughout the region.

The decision to expand comes as businesses throughout North Texas face aging equipment and rising operational costs. Commercial facilities depend on dependable systems to maintain comfortable and

productive environments, and many heating and cooling companies in the area have reported increased requests for both new installations and timely repairs. The expanded services address this demand with a focus on energy-efficient equipment and precise installation.

David, a representative of 822 Heat and Air, noted that the expansion responds directly to feedback from commercial clients across the Metroplex.

"Commercial properties have different requirements than residential homes, and businesses need systems that run efficiently while keeping disruption to a minimum," David said. "Expanding commercial HVAC installation and AC repair services allows the team to meet those requirements with certified technicians who handle every stage of a project, from initial consultation through post-installation maintenance."

The company serves a wide service area that includes Fort Worth, Arlington, Dallas, Crowley, Burleson, Benbrook, Granbury, Joshua, Godley, Cleburne, Kennedale, and surrounding suburbs. In each of these communities, 822 Heat and Air provides commercial HVAC service alongside residential offerings such as seasonal maintenance, diagnostics, AC tune-ups, furnace and heating repairs, and complete system replacements.

The company emphasizes energy-saving solutions intended to reduce operational costs for commercial clients while contributing to a more sustainable environment. Certified technicians conduct thorough diagnostics before recommending a course of action, ensuring that each system is matched to the needs of the facility it serves. Transparent assessments are provided before any work begins.

"The goal with this expansion is straightforward," David added. "Businesses in the region should have access to a single contractor that can manage installation, repair, and ongoing service with consistency and care. That continuity makes a measurable difference in how well a system performs over its lifespan."

822 Heat and Air is a professional HVAC company that provides both commercial and residential services throughout the Greater DFW Metroplex and its suburbs. The company offers commercial HVAC service, residential HVAC, ductwork, and AC tune-up services, with a focus on energy efficiency and year-round comfort. Its team of licensed and insured technicians uses current technology and methods to deliver installation, repair, and maintenance work. The company is licensed under TACLA65080C and offers financing subject to credit approval and offer eligibility.
