

## **New Custom Bow String Builder Coming Soon**

*June 16, 2016*

June 16, 2016 - PRESSADVANTAGE -

60x Custom Strings, a business in Cowansville, PA, which offers top quality custom bow strings proven to win world and national archery competitions, has announced that they are in the process of developing a new stringbuilder. Their website will soon feature the interactive stringbuilder, encouraging people to design the best bowstrings they will ever own.

Brad Patsy from 60x Custom Strings says: "We are about ready to launch our custom string builder. When you design your bowstring, you will be able to choose from a range of custom colors and materials. We only use the highest quality bowstring materials when we manufacture your uniquely designed bowstrings, using our own proprietary equipment. Adding the custom string builder to our website means that our customers will be able to truly show their own true colors."

60x Custom Strings is known for its high bowstring quality and performance. Target archers and bow hunters alike rely on 60x Custom Bowstrings and Cables. Meanwhile, the company is committed to ensuring that the price remains affordable for everyone, whether they are globally competing tournament archers, or weekend bow hunters. For 60x, the goal is to make sure that people can choose and own the archery strings that are right for them. With the new string builder, those strings can be completely unique as well.

Those who have used the services of 60x Custom Strings have been very happy about the products they have received, and it is anticipated that similar reviews will follow once the custom string builder goes live. "[I] follow[ed] the recommendation of a hunting buddy when it was time to replace my strings," says Marlon D.U. on the company's Facebook page. "The strings actually came before they were scheduled to, the quality was as advertised, and upon installing the strings on my bow and shooting my bow there was zero peep rotation just as advertised. So if you're in the market for a new set of strings give 60x Custom Strings a call or visit their website at [www.60xcustomstrings.com](http://www.60xcustomstrings.com)."

Further details will be released by 60x Custom Strings once the string builder goes live.
