

A&M Roofing Earns Continued Recognition as a Leading Siding Contractor in Northern Virginia

October 19, 2026

SPRINGFIELD, VA - October 19, 2026 -

A&M Roofing, a locally owned and operated roofing and exterior home services company based in Springfield, has accumulated a substantial record of five-star customer reviews across nearly two decades of serving homeowners throughout the region. The company continues to build its reputation on consistent workmanship, timely service, and transparent communication with property owners.

The firm has served the area for close to twenty years, offering roofing, skylight installation, window and door replacement, siding installation, and seamless gutter systems. As a siding contractor in Northern Virginia, homeowners have come to recognize that A&M Roofing has earned an A+ rating with the Better Business Bureau and maintains membership in both the Virginia Association of Roofing Professionals and the Northern Virginia Chamber of Commerce.

"The feedback from homeowners reflects the standards the team sets on every project," said Mark Collins, a spokesperson for A&M Roofing. "When a family trusts the company with their home after a storm or

during a planned renovation, the goal is to complete the work correctly the first time and to communicate clearly at every stage."

A&M Roofing is accredited by leading shingle manufacturers and works with a range of roofing materials, including asphalt shingles, synthetic slate, flat roofing, and metal roofing. The company is also a Velux Certified Installer for skylights and sun tunnels, and it carries certifications for door and window replacement products designed to improve energy efficiency.

Much of the company's recent activity has centered on helping homeowners address exterior damage caused by severe weather. Northern Virginia storm damage roof replacement remains among the most frequently requested services, particularly following periods of high wind, hail, and heavy rainfall that can compromise roofing materials and exterior surfaces.

On the siding side, A&M Roofing is a Mastic Preferred Siding Contractor and installs Mastic siding from Ply Gem as well as James Hardie siding, a non-combustible and weather-resistant material. The company's gutter division installs five-inch and six-inch aluminum seamless gutter systems, custom fabricates seamless gutters on-site, and offers Leaf Relief gutter guards to reduce clogging.

Collins noted that the company's review history reflects a cross-section of its service offerings rather than a single category of work. "Homeowners share their experiences across roofing, siding, windows, and gutters," he said. "That range of positive feedback speaks to the consistency the team aims for regardless of the project size."

The accumulation of five-star reviews comes as demand for exterior home improvements continues across the region, driven in part by aging housing stock and recurring severe weather events. Industry observers note that homeowners increasingly prioritize contractors with verifiable track records and manufacturer accreditations when selecting a company for roofing and siding work.

A&M Roofing is a Springfield-based company serving homeowners throughout Northern Virginia with roofing, siding, skylight, window, door, and gutter services. With nearly two decades of operation, manufacturer accreditations, and an A+ rating from the Better Business Bureau, the company focuses on high-quality workmanship and reliable service for residential properties across the area.
