

A&M Roofing Marks Twenty Years of Roofing and Replacement Services in McLean VA

October 19, 2026

MCLEAN, VA - October 19, 2026 -

A&M Roofing, a licensed roofing company serving Northern Virginia, has reached a milestone of more than twenty years of continuous service to residential and commercial property owners throughout the region. The company marked the occasion by highlighting the customer feedback that has accumulated over two decades of work, including numerous five-star reviews from homeowners and businesses.

Founded as a local, family-oriented operation, A&M Roofing has built its practice around full-service roofing work. Its offerings include new roof Installation for homes under construction, complete roof replacement typically required every fifteen to twenty years depending on materials, and routine maintenance intended to extend the service life of existing roofs. The company also handles roof repairs resulting from storm damage, fallen trees, and ordinary wear over time.

Over its history, the company has expanded its work beyond roofs to include gutters, siding, windows, and doors. A&M Roofing employs HAAG-certified technicians who perform roof inspections to assess the

condition of a structure and identify problem areas before they develop into larger concerns.

"Reaching twenty years in this trade reflects the trust that property owners across the community have placed in the team," said Mark Collins, a representative of A&M Roofing. "The record of five-star feedback tells the story of consistent work rather than a single project. People remember how their home was treated long after the job is finished."

The company credits its longevity to its use of certified technicians, quality roofing materials, and adherence to industry standards. Each technician carries the appropriate certifications and insurance required to perform the work. Examples of the customer feedback the company references can be viewed among its published five-star reviews.

The demand for professional roofing in McLean, VA services has grown alongside residential and commercial development across Northern Virginia. A&M Roofing replacement in particular has become a recurring need for older properties, as asphalt shingle roofs and similar materials approach the end of their expected lifespan. A&M Roofing noted that regular inspection and maintenance can help property owners plan replacement projects in advance rather than respond to sudden failures.

"A roof is one of the elements of a property that is easiest to overlook until something goes wrong," Collins added. "Scheduling an inspection before a problem appears gives owners the information to make decisions on their own timeline. That approach has defined how the company has operated from the beginning."

A&M Roofing stated that it intends to continue serving the same community that supported its first two decades, maintaining its focus on residential and commercial roofing, gutters, siding, and related exterior work.

A&M Roofing is a McLean-based roofing company that has served the Northern Virginia community for more than twenty years. The licensed company provides new roof installation, roof replacement, routine maintenance, and repair services, along with gutter, siding, window, and door work. Its HAAG-certified technicians perform roof inspections and carry the certifications and insurance required for their trade. The company works with both residential and commercial property owners throughout the region.
