

Copperhead Construction & Remodeling Highlights Kitchen Remodeling Planning for Midvale Homeowners

October 16, 2026

Midvale, Utah - October 16, 2026 -

Copperhead Construction & Remodeling, a family-owned remodeling contractor based in Midvale, Utah, is drawing attention to the planning and decision-making that homeowners along the Wasatch Front consider when updating an existing kitchen. The company serves communities throughout Salt Lake County, Utah County, Davis County, and Summit County, and offers kitchen remodeling as one of its core residential services.

Kitchen remodeling remains among the more involved home improvement projects a homeowner can undertake, often requiring choices about layout, finishes, and sequencing before any work begins. Copperhead Construction & Remodeling kitchen remodeling services address several of these decisions, including custom cabinetry installation, stone countertop upgrades, custom tile backsplashes, center islands, modern lighting, and layout reconfigurations. The company notes that homeowners frequently weigh whether to pursue a sleek modern appearance or a more timeless traditional style as part of the early planning stage.

According to the company, the scope of a kitchen remodel, the number of selections finalized before work starts, and permit requirements all influence both timeline and overall cost. To help manage these variables, Copperhead Construction & Remodeling provides free quotes, full project management, and permit coordination and submission, guiding projects from an initial estimate request through a final walkthrough.

"A kitchen remodel touches nearly every part of how a household functions, so the planning phase matters as much as the construction phase," said Ralph Kunz of Copperhead Construction & Remodeling. "Homeowners who think through layout, finishes, and selections early tend to experience a smoother project from start to finish."

The company emphasizes its connection to Midvale, where it operates as a general contractor and serves surrounding communities including Murray, Cottonwood Heights, Salt Lake City, West Jordan, Taylorsville, South Jordan, Holladay, and Sandy. That local presence allows the company to coordinate the permitting and scheduling steps that often shape a project's timeline.

"Being based in Midvale keeps the team close to the neighborhoods served, which helps with communication and day-to-day coordination," Kunz said. "Clear expectations about layout changes and material selections help keep a remodel on schedule."

Beyond kitchen work, Copperhead Construction & Remodeling offers a range of residential and commercial services, including home remodeling, bathroom remodeling, basement finishing, home additions, accessory dwelling units, decks and outdoor living, and commercial remodeling. The company handles projects from initial design through final finishes and maintains ongoing communication with clients throughout each phase.

Copperhead Construction & Remodeling is a family-owned construction and remodeling company based in Midvale, Utah, serving the Wasatch Front. The company is fully licensed and insured and focuses on residential and commercial projects that reflect each client's vision and lifestyle. Its services span custom home building, remodeling, home additions, kitchen and bathroom remodels, commercial remodels, basement finishes, and outdoor living spaces, delivered through a process that emphasizes quality, transparency, and attentive service.
