

XRoofing Expands Commercial Roofing Services for Businesses in Indian Trail, NC and the Carolinas

October 23, 2026

INDIAN TRAIL, NC - October 23, 2026 -

XRoofing LLC, a roofing company based in Indian Trail, North Carolina, has expanded its commercial roofing services to businesses and property managers across a 150-mile radius in North and South Carolina. The expansion gives local companies a contractor with an established residential track record and written, itemized pricing for flat and low-slope roof work.

XRoofing is a locally owned and operated contractor that has replaced, repaired and maintained roofs in the Indian Trail area for more than 15 years. The company built its reputation on residential roofing, with most new customers coming through referrals from neighbors. Its service area includes Matthews, Monroe, Waxhaw, Stallings, Mint Hill, Concord, Kannapolis and Gastonia in North Carolina, along with Rock Hill, Fort Mill and Lancaster in South Carolina.

As a roofing company in Indian Trail, NC, XRoofing is licensed, insured and bonded, and carries general liability and workers' compensation coverage on every project. The company has earned a 5.0-star rating on Google. Roof replacements include manufacturer and workmanship warranty coverage, and emergency roof repair is available 24 hours a day, 7 days a week.

"A lot of the business owners calling us first hired us for their own homes," said Jose Saucedo, Owner of XRoofing. "They wanted the same straight answers and written quotes for their buildings. Commercial roofs keep local shops, offices and rental properties running, and we wanted to be able to say yes to that work."

The expansion comes as XRoofing's customer base grows across Union County and neighboring counties. The fall timing also lets property managers schedule inspections and repairs before winter weather and the spring storm season.

XRoofing's commercial services cover businesses, property managers, warehouses, retail centers, schools

and multifamily complexes. The company installs and replaces TPO, EPDM, PVC and modified bitumen flat roof systems, with work planned to limit disruption to daily operations. Commercial clients can also set up inspection and maintenance contracts, including drone-assisted inspections for large or complex roofs, along with HVAC curb and rooftop equipment flashing.

The commercial division follows the same process the company uses on homes: an on-site inspection, a written and itemized estimate, and a clear timeline before work begins. XRoofing's insurance claim assistance also covers commercial properties, including damage documentation, adjuster meetings and Xactimate scope review. Businesses with storm damage can request roof repair in Indian Trail, NC through the same 24/7 emergency line homeowners use.

"Flat roofs don't give you much warning," Jose Saucedo (CEO/Owner) said. "Water sits, seams open up, and by the time there's a stain on a ceiling tile the damage has been going a while. Having a commercial roof looked at twice a year saves a lot of headaches."

XRoofing's full service list includes roof replacement and installation, roof repair, emergency roof repair, roof inspections, maintenance plans, storm damage repair, gutters and gutter guards, gutter cleaning, fascia and soffit, flashing, attic ventilation, skylights and chimney repair. The company installs asphalt shingle, metal, tile, slate, wood shake, synthetic and composite roofing, plus TPO, EPDM, PVC and modified bitumen flat roofing systems. It also offers insurance claim assistance, financing and free written estimates.
