Summit Scapes Construction Announces Seasonal Commercial Snow Plowing for Winter

October 19, 2026

MANLIUS, NY - October 19, 2026 -
Summit Scapes Construction is offering seasonal commercial snow-plowing contracts for the upcoming winter, providing businesses across its Central New York service area with planned snow clearing and additional removal options as snow accumulates. The Kirkville-based landscaping and hardscaping company offers seasonal plowing agreements for commercial properties and snow removal as an add-on or one-time service when snowbanks begin to reduce usable parking and access areas.

Seasonal snow plowing contracts are available in Kirkville, Minoa, Fayetteville, the Village of East Syracuse, Manlius, DeWitt, and Jamesville. Under these agreements, crews typically begin clearing when snowfall reaches two inches, with the goal of completing work within a few hours. Actual timing depends on the size of the property and the amount of snow that has accumulated.

The company's commercial plowing service uses plows and skid steers to clear parking lots, driveways, entrances, loading areas, and other spaces used by customers, employees, and deliveries. Snow is pushed to designated areas on the property, allowing businesses to maintain access through winter weather. Service plans account for individual property layouts and the available space for snow storage.

As winter progresses, snowbanks can occupy parking spaces, obstruct walkways, and limit room for additional accumulation. Summit Scapes Construction offers commercial snow removal to address those conditions. Crews can push back or relocate snow to another area on the property or haul it completely off-site when space is limited. Snow removal can be incorporated into a seasonal plowing agreement or scheduled as a one-time service.

?Snow plowing and snow removal address different needs throughout the winter,? said Jared Van Der Veer, owner of Summit Scapes Construction. ?Plowing moves snow to a designated area on the property, while removal relocates larger piles or hauls them away when there is no longer enough room to store them.?

The company lists a broader service area for snow removal and hauling than for seasonal plowing contracts. Removal services are available in Kirkville, Minoa, Fayetteville, Chittenango, Bridgeport, East Syracuse, Manlius, DeWitt, Jamesville, Canastota, Cicero, North Syracuse, Cazenovia, Pompey, Liverpool, Fabius and Camillus. Standard and emergency commercial snow removal services are not available within Syracuse city limits.

For commercial snow removal, the company's published service information lists a skid steer, dump truck, and crew, with a two-hour minimum. Standard commercial snow removal is listed at $325 per hour, while emergency commercial snow removal is listed at $450 per hour. The company states that emergency removal crews are scheduled to arrive within eight hours of a call. Prices are subject to New York State sales tax.

Ice treatment is another option for seasonal plowing customers. The company states that standard rock salt treatment can be included in seasonal snow plowing plans, providing an additional measure for managing icy conditions around commercial properties.

Summit Scapes Construction brings more than 13 years of experience to its landscaping, hardscaping, and snow removal work. Its winter services extend the company's property maintenance capabilities into a season when parking availability, walkways, and delivery access can require ongoing attention. The company works with commercial properties of different sizes, with service arrangements shaped by the property and the type of snow management required.

Summit Scapes Construction is a locally owned landscaping and hardscaping company based in Kirkville, New York. The company provides outdoor construction and property services, including hardscape installations, landscape work, commercial snow plowing, and snow removal in Central New York.
