

Woodlawn Tree Service Expands Expert Care Across West Virginia With Maysville Area Coverage

October 28, 2026

CABINS, WV - October 28, 2026 -
Woodlawn Tree Service, a family-owned arborist firm with more than 35 years of experience, continues to grow its presence throughout West Virginia, serving communities including the Maysville area with a full slate of tree care services and nursery offerings.

Founded and operating in Cabins, West Virginia, the company has built its reputation around professional tree pruning, tree removal, tree nursery, and tree health assessment in Maysville. Matt, a Board Certified Master Arborist, leads the firm, working alongside his sons Zachary and Toby. Together, the team applies decades of combined knowledge to diagnose tree diseases, manage pests, and guide property owners on long-term tree health.

As a full-service tree company, Woodlawn addresses needs ranging from routine pruning that protects trees against disease to the safe removal of dead or hazardous specimens. The company emphasizes that proper pruning benefits the entire tree by removing specific branches or stems, while health care services focus on

the longevity and vitality of mature trees on residential and commercial properties.

The company's consistent record of five-star client reviews reflects the quality and professionalism that have defined its work for more than three decades. Clients across the service region have recognized the team for its expertise, attention to detail, and commitment to healthy tree ecosystems. One such review can be found among the company's published client feedback on its Google listing.

"Trees represent long-term investments for property owners, and the goal has always been to help those trees thrive for generations," said a representative of Woodlawn Tree Service. "Serving a wider region, including communities near Maysville, allows the team to share decades of arborist experience with more homeowners and landowners who care about the health of their landscapes."

Beyond maintenance and removal, Woodlawn operates a tree Nursery where the company cultivates a variety of tree species suited to the local environment. The nursery supports planting services that begin with selecting appropriate trees based on soil, climate, and the specific needs of each site. This approach reflects the company's broader focus on sustainable, informed tree care rather than one-size-fits-all solutions.

"Choosing the right tree for the right location is one of the most important decisions a property owner can make," the representative added. "The nursery and planting services exist to guide that decision from the ground up, ensuring that new trees are set up for long-term success."

The company also provides consultation services, offering property owners expert guidance on tree care and maintenance. Drawing on a deep understanding of tree biology and regional growing conditions, the team helps clients make informed choices about pruning schedules, disease prevention, and planting strategies.

Woodlawn Tree Service in Maysville remains committed to promoting healthy trees across the communities it serves. With a leadership team rooted in professional arboriculture and a service area that spans two states, the company continues to support landowners seeking knowledgeable, long-term care for their trees.
