

Go Industries Expands Lineup with Commercial Grade Grille Guards Featuring Integrated Winch Mounts

November 03, 2026

Richardson, TX - November 03, 2026 -
Go Industries Inc has expanded its line of front end protection products with the introduction of a commercial grade integrated winch system designed for heavy duty truck applications. The new modular system builds on the company's existing winch grille guard offerings, providing operators with a reinforced base for adding winch carriers and brush guards.

The commercial grade system is constructed from 5/16 laser cut steel uprights paired with 2.5 inch 16 gauge steel cross tubes. This modular approach allows the guard to serve as a foundation for additional components, including optional brush guards that provide added protection to the headlight area from road debris and off-road brush. The expanded line gives truck owners and commercial fleet operators additional configuration options when selecting grille guards with winch mounts for their vehicles.

Each unit ships with custom, heavy-duty mounting brackets engineered for strength and designed with installers in mind. Optional 9.5 and 16.5 winch carriers are available, allowing customers to match the system

to specific operational requirements. The products carry a three year warranty covering materials, workmanship, and finish, and all parts are manufactured in the USA.

"The commercial grade winch system reflects a continued focus on durability and practical design," said a spokesperson for Go Industries. "The modular construction means operators can start with a solid base and add the winch carrier and brush guards that suit their needs, whether the vehicle is used for work, recreation, or demanding off-road conditions."

The addition strengthens a product category that has long been central to the company's truck accessory business. Go Industries manufactures a range of front and back end protection products, including Rancher Grille Guards, BigTex Grille Guards, medium duty grille guards, Pro Series bumper replacements, and heavy duty headache racks for trucks. The expanded grille guards with winch mounts join this broader catalog of American-made protection equipment.

"Demand for integrated winch solutions has grown as more owners use their trucks in challenging environments," the spokesperson added. "Offering grille guards with winch mounts built from laser cut steel allows customers to combine recovery capability with front end protection in a single, well-engineered package."

The company noted that the commercial grade system is customizable based on the year, make, and model of the vehicle, with color and accessory options available at the time of order. Brush guards and winch carriers can be selected as part of the modular build.

Go Industries has served the truck accessory and custom manufacturing market since 1978. Based in Richardson, Texas, the company specializes in truck accessories, law enforcement vehicle equipment, and custom manufacturing. Its product range includes grille guards, winch application systems, bumper replacements, air flow tailgates, headache racks, mud flaps, and steps, along with specialized accessories for Chevrolet, Dodge, and Ford law enforcement vehicles. Grille guards, bumper replacements, and headache racks produced by Go Industries are made in the USA. The company holds Platinum Status with SEMA and provides resources such as product instructions, a product catalog, warranty information, and installation videos.
