Jigsaw & Associates Launches Mobile And On-Site Bookkeeping And Accounting Services

June 24, 2016

June 24, 2016 -
Jigsaw & Associates, located in Oklahoma City, Oklahoma, has launched a new company with services including Accounting, Bookkeeping, Payroll, Taxes, Business Consulting, and on-site mobile services for both individuals and business owners. The company has introduced these services knowing accounting and taxes are both complex financial operations that require accurate and timely reporting to ensure specific regulations are met.

Recognizing the number of small business owners and individuals struggling to maintain compliance, and the costly mistakes being made along the way is the primary reason the company considers their services to be invaluable. Additional details are available on the company's website at www.jigsaw-associates.com.

Veronica Ray, owner of Jigsaw & Associates, explains: "My mission is to empower and assist entrepreneurs in structuring their business and ultimately building financially solid companies from the beginning and to assist small business owners by providing them the first class financial services they need, without the high cost. We provide ongoing training on a monthly basis, covering a vast array of training material and information. And even better, we've made our professional services totally mobile."

Jigsaw & Associates employs only the highest qualified staff to provide these services. They have obtained the necessary qualifications as Xero Certified Advisors, QuickBooks Pro Advisors, Certified Professional Bookkeepers, and IRS Registered Tax Preparers. Their fulfillment of continuous personal and professional development enables them to best meet the demands of their clientele. Additionally, Veronica Ray points out that she uses her trust in God to further improve her services.

Part owner, Betty Naff, attended multiple tax schools and worked for several tax agencies and companies throughout Oklahoma. "My primary focus is on tax strategies. I continued my education in the classroom and applied practical, real-life settings, in the business world. Leading a team of tax professionals for the duration of my career, now I operate as an IRS Registered Tax Professional."

Jigsaw & Associates saw the need for mobile accounting and bookkeeping services for their clients. Ray says, "Our ability to meet clients in their office has increased the value of our services even more. It's not always convenient or even practical for a business owner who is involved in the day to day operations to schedule time out of their day; even when it is critical to the business. That's why we come to you. We want our financial services to be a joy, not more taxing than it already is."
