Livermore Roofers Extends Services Beyond Roof Repairs

June 23, 2016

June 23, 2016 -
Livermore Roofers, a company based in Livermore, CA, has announced that they have extended their range of services to go beyond roof repairs. This is because when roofs are damaged, it is not uncommon for other elements of a property to be damaged as well. Their services now include window replacement, outside property painting, and rain gutter fixes and installation. All of these added services are usually needed by homes that need roof repair either due to storm damage or the advancing years of the property. Full details about their services can be viewed on their website at http://www.livermoreroofers.com.

James Grant from Livermore Roofers says: "We are master contractors in supplying household as well as industrial roof covering options, from asphalt roof shingles, metal roof covering, to the most up to date energy-efficient membranes for office roof coverings. However, many of our clients have been requesting additional kinds of work. Thus, we had to expand our services."

The company provides all types of roofing solutions for residential properties, such as rock coated steel, asphalt shingles, low incline applications, concrete ceramic tile, asbestos reduction, and synthetics. With the addition of the other services, the company wants to set itself apart by being a quality provider of home repair services. Since the company started, they have had a strong focus on customer care, offering uncompromising high quality and an excellent attention to detail. The company has already received numerous awards and certifications to highlight this, as well as various written and video testimonials.

Another thing that makes this company unique is that they are committed to creating a workplace in which employees feel supported and rewarded for their hard work. They want to foster integrity and a positive attitude. To achieve this, they want to remain fully up to date with the latest technologies and techniques now not just in roof repair, but also in their other new services.

People who feel they require any of the company's services, whether after a storm or not, are encouraged to contact them using their website, where an easy to use contact form has been included. Offering free, no obligation quotations, Livermore Roofers wants to make sure people know exactly where they stand.
