

Zahnarzt Basel Highlights Rapid Dental Solutions With 24/7 Emergency Care Available 365 Days a Year

November 07, 2026

Basel, Basel-City - November 07, 2026 -
Zahnarzt Basel, a dental practice operating under Die Notfallzahnärzte, confirmed that its emergency dental services remain available to patients in Basel every day of the year, including weekends and holidays. The clinic, situated in Basel City within close proximity to the Basel SBB railway station, continues to provide immediate assistance for sudden dental issues such as severe toothaches, broken teeth, and loose crowns.

The practice operates an emergency call center that responds to urgent dental situations nearly around the clock. By maintaining service 365 days a year, the clinic addresses a common gap in dental care, when emergencies occur outside standard practice hours. Patients experiencing acute pain or dental trauma can receive timely attention rather than waiting for conventional appointment windows.

The central location in Basel City supports accessibility for both local residents and travelers. The proximity to Basel SBB allows patients arriving by train or public transport to reach the clinic with ease, a factor that can prove significant during a dental emergency when time is a consideration.

Beyond emergency treatment, Zahnarzt Basel provides a broad range of dental care. Services include dentistry for children, dental implants, and preventive prophylaxis aimed at maintaining oral health and addressing concerns before they escalate. The clinic also treats craniomandibular dysfunction (CMD), a condition affecting the muscles and joints connecting the jaw to the skull. An in-house dental laboratory enables the practice to produce solutions on site, supporting faster treatment timelines.

Additional details about the clinic's emergency offerings are documented at storage.googleapis.com/local-business-services/Zahnarzt-Basel-Notfall.html

The clinic places emphasis on patients who feel nervous about dental visits, as well as families and children requiring specialized attention. Information about emergency treatment costs is made available in advance, allowing patients to understand expected expenses before receiving care.

Dr. Jacques Schultheiss of Zahnarzt Basel described the reasoning behind the continuous availability. "Dental emergencies do not follow a schedule, and pain rarely waits for business hours. Maintaining care every day of the year allows patients in Basel to receive attention when they need it, rather than enduring discomfort until a practice reopens," he said.

Dr. Schultheiss added that the clinic's structure is designed around prompt response. "Having an in-house laboratory and a central location near Basel SBB means treatment can begin quickly. For someone with a broken tooth or an acute toothache, reducing the time between the first call and the actual treatment matters a great deal," he said.

The full announcement regarding the clinic's round-the-clock services is published at pressadvantage.com/story/82390-zahnarzt-basel-offers-24-7-emergency-dentist-services-and-comprehensive-oral-solutions.
