

Outdoor Lighting Concepts Expands Customized Landscape Lighting Services for Boca Raton Homes and Businesses

November 03, 2026

BOCA RATON, FL - November 03, 2026 -
Outdoor Lighting Concepts has expanded its range of customized landscape lighting services for residential and commercial properties throughout the Boca Raton area. The move addresses growing local demand for energy-efficient outdoor lighting that enhances both the appearance and security of homes and businesses.

As a Boca Raton outdoor lighting company, the firm designs and installs tailored lighting systems using low voltage LED technology. These systems are intended to reduce electricity consumption while illuminating gardens, pathways, patios, hardscapes, and water features. The company offers curb appeal lighting, accent lighting, pathway lighting, deck and patio lighting, and permanent holiday lighting, along with lighting control automation that allows property owners to manage their systems with a single interface.

The expanded offering also includes color-changing systems and outdoor audio integration, giving clients the ability to adjust the mood of their outdoor spaces for different occasions. Commercial clients can access

lighting plans developed to improve the aesthetic appeal of their properties while supporting safety after dark.

Spencer Freimanof Outdoor Lighting Concepts noted that the demand for outdoor lighting in the region reflects broader trends toward outdoor living and energy efficiency.

"Property owners are spending more time outdoors and want spaces that remain functional and inviting into the evening," Freiman said. "Each design is built around the specific features of a property, which means no two installations are the same. The focus is on combining aesthetics, safety, and energy efficiency in a way that fits how people actually use their outdoor areas."

The company emphasizes proactive maintenance as part of its service model, helping clients keep their lighting systems operating correctly over time. This includes periodic inspections and adjustments to account for landscape growth and seasonal changes. Freiman added that ongoing support is a central part of how the company approaches its work.

"Lighting systems perform best when they are maintained," Freiman said. "Landscapes change throughout the year, and the lighting should adapt with them. Regular maintenance keeps the design looking as intended long after the initial installation."

Outdoor Lighting Concepts in Boca Raton, FL serves both residential and commercial clients, with projects ranging from single-feature accent lighting to comprehensive property-wide systems. The company's approach centers on low voltage LED landscape lighting, which draws less power than traditional lighting while producing consistent illumination.

The expansion comes as energy-efficient outdoor lighting continues to gain attention among property owners seeking to reduce costs and environmental impact. LED and low voltage systems have become increasingly common in landscape design, offering longer service life and lower operating expenses compared with older lighting technologies.

Outdoor Lighting Concepts is a landscape lighting contractor based in Boca Raton, FL. The company specializes in the design, installation, and maintenance of custom outdoor and landscape lighting for residential and commercial properties. Its services include residential and commercial lighting, color-changing systems, outdoor audio, and ongoing maintenance.
