

AccuTemp Cooling and Heating Expands HVAC Service Coverage Across Northwest Louisiana

November 18, 2026

Shreveport, Louisiana - November 18, 2026 -
AccuTemp Cooling and Heating has expanded its service area to include homeowners and businesses throughout Shreveport, Blanchard, Bossier City, Benton, Haughton, and Stonewall, Louisiana, reinforcing its presence as a local HVAC service provider as seasonal temperature swings increase demand on residential and commercial climate systems.

The expanded coverage addresses a growing need across Northwest Louisiana, where fluctuating weather conditions require dependable heating and cooling year-round. AccuTemp Cooling and Heating offers a full range of services designed to keep indoor environments comfortable and safe, including air conditioning installation and repair, heating repair and maintenance, and commercial HVAC repair and maintenance for area businesses.

Beyond temperature control, the company continues to prioritize household safety with advanced carbon monoxide detectors that alert occupants to dangerous levels of the colorless, odorless gas. AccuTemp also

installs reliable home backup generators, helping families and businesses maintain power during outages that can accompany severe regional weather.

"Expanding into communities such as Blanchard, Benton, and Stonewall allows the company to support more households and businesses that depend on consistent heating and cooling," said Duane Simpson, speaking for AccuTemp Cooling and Heating. "Many residents across Northwest Louisiana have experienced equipment strain during extreme temperatures, and the goal is to provide timely, professional service to every community served."

The decision to broaden service areas follows years of steady growth since the company was founded in 2004. With more than 40 years of combined HVAC experience, the team focuses on both preventive maintenance and responsive repair. According to the company, regular maintenance can reduce the likelihood of sudden breakdowns, improve energy efficiency, and extend the lifespan of heating and cooling equipment.

For commercial clients, the company notes that scheduled HVAC maintenance can contribute to energy savings and help avoid costly interruptions to daily operations. Business owners in the newly added service areas now have access to the same repair and maintenance support previously concentrated in the Shreveport and Bossier City markets.

"Reliability is at the center of every service the company provides," Simpson added. "Whether a homeowner needs a system replaced before summer or a business requires ongoing commercial maintenance, residents can contact our team of experts for assessment and support across the expanded coverage area."

AccuTemp Cooling and Heating uses materials from established manufacturers, with an emphasis on long-lasting, energy-efficient systems. The company serves Shreveport, Blanchard, Bossier City, Benton, Haughton, Stonewall, and surrounding communities throughout Northwest Louisiana.

AccuTemp Cooling and Heating is a trusted HVAC contractor based in Shreveport, Louisiana.
